**Confronting Animal Exploitation** Nov 06 2022 As animal exploitation increases, animal liberation issues are of growing concern, as seen through the rise of veganism, academic disciplines devoted to animal issues, and mainstream critiques of factory farms. Yet as the dialogues, debates and books continue to grow, the voices of "street level" activists—not academics, journalists or vegan chefs—are rarely heard. This volume broadens animal liberation dialogues by offering the arguments, challenges, inspiration and narratives of grassroots activists. The essays show what animal advocacy looks like from a collective of individuals living in and around Minnesota's Twin Cities; the essayists, however, write of issues, both personal and political, that resound on a global scale. This collection provides a platform for rank and file activists to explain why and how they dedicate their time and what is being done for animals on a local level that can translate to global efforts to end animal exploitation.

*Water Governance* Oct 01 2019 Ensuring that everybody has access to drinking water, sanitation and enough nutritious food, which depends on water to grow it, are prerequisites for a healthy life. Water management is not just about the technical aspects of water supply and sanitation. It is equally about our water governance systems, including policies, regulation and societal perception of water rights. This book presents many helpful examples of how different societies are dealing with these issues and of the performance of public and private sector players in this important arena.

Colin Chartres, International Water Management Institute (IWMI), Colombo, Sri Lanka Ô congratulate the Institute of Water Policy, the two editors and the contributors for a very thoughtful book on urban water governance. Our objective is to deliver sustainable water and sanitation services to our people. This book contains useful lessons on how to achieve that objective.Ô Æ Tommy Koh, Chairman, Governing Council, Asia-Pacific Water Forum This insightful book explores urban water governance challenges in different parts of the world and highlights the advantages and disadvantages of publicly run, privatized, and publicÐprivate partnership managed water facilities. The contributors expertly discuss various types of public and private water governance architectures as well as identifying the trends, challenges, opportunities and the shifts in perceptions with regard to the provision of water supply services. Many chapters are dedicated to analyzing the urban water supply scenarios in selected countries, with specific focus on legal, policy and institutional frameworks. The study reveals that while private sector participation has been largely promoted by multilateral institutions as part of institutional and financial reforms, ultimately governments bear the major responsibility for provision of water supply services either as Ôservice providerÕ or as Ôregulator and policy-makerÕ. Containing a detailed overview and analysis of the global urban water supply sector, this timely compendium will strongly appeal to academics, researchers and university students following water-related courses. Water sector professionals, water regulators and public officers as well as managers and researchers employed by private sector water operators will also find plenty of invaluable information in this important book.

**Transnational Financial Associations and the Governance of Global Finance** Dec 15 2020 The role of business in global governance is now widely recognized, but exploration of its role in global financial governance has been more haphazard than systematic. This book provides the first

comprehensive analysis of the role of transnational financial associations (TFAs) in the organization of global finance. This book develops three theoretical themes of assemblage, functionality, and power as enrolment. These themes challenge approaches that treat financial power as emanating from a single location or force. Whilst existing approaches tend to treat TFAs as irrelevant or as merely transmitting power originating elsewhere, this book argues that power must be created by painstakingly assembling actors, networks, and objects that are often quite autonomous and working at cross purposes to one another--a process in which TFAs play a central role. The book explores these themes in chapters examining the roles of TFAs in interacting with public authorities, constructing global financial markets, and creating financial communities. The authors additionally analyse the roles of TFAs in the European Union, in the Global South, and in promoting goals other than profitability, including Islamic finance, microfinancing, savings banks and cooperatives. Making a distinctive contribution to our understanding of global finance and global governance, *Transnational Financial Associations and the Governance of Global Finance* is an important book for students and scholars of international political economy, finance, global governance and international relations.

Football Supporters and the Commercialisation of Football Sep 11 2020 As football clubs have become luxury investments, their decisions increasingly mirror those of any other business organisation. Football supporters have been encouraged to express their club loyalty by 'thinking business' - acting as consumers and generating money deemed necessary for their clubs to compete at the highest levels. In critical studies, supporters have been portrayed as passive or reluctant consumers who, imprisoned by enduring club loyalties, embody a fatalistic attitude to their own exploitation. As this book aims to show, however, such expressions of loyalty are far from hegemonic

and often interface haphazardly with traditional ideas about what constitutes the 'loyal fan'. While there is little doubt that professional football is experiencing commodification, the reality is that football clubs are not simply businesses, nor can they ever aspire to be organisations driven solely by expanding or protecting economic value. Rather, clubs hover uncertainly between being businesses and community assets. *Football Supporters and the Commercialisation of Football* explores the implications of this uncertainty for understanding supporter resistance to, and compromise with, commodification. Every club and its supporters exist in their own unique national and local contexts. In this respect, this book offers a Euro-wide comparison of supporter reactions to commercialisation and provides unique insight into how football supporters actively mediate regional, local and national contexts, as they intersect with the universalistic presumptions of commerce. This book was previously published as a special issue of *Soccer and Society*.

[Russia and the World](#) Aug 11 2020 This volume brings together analyses of key domestic, foreign

and security policy issues during the Putin and Medvedev administrations. Indeed, the chapters demonstrate the extent to which domestic and foreign policy issues are inextricably linked, in particular in the domain of security, whether 'hard' or 'soft'. Internal debates regarding Russia's trajectory, including issues of national identity; economic modernisation, human rights and democracy, continue to be at the forefront of concern. Moreover, these debates are intimately connected to Russia's self-image and the image therefore, that it wishes to project in the wider world. The debates focus on Russia as 'energy superpower'; as one of the 'BRICS'; as an Eurasian landbridge, or a window on the Asia-Pacific. Such debates are a constant reminder of the uncertainty surrounding Russia's future path. This book expresses these uncertainties which range from the role of nuclear weapons and energy to critiques of Russia's approach to concepts such as sovereignty and self-determination; the fight against terrorism, insurgency, and the role of Islam within and without. Russia may have left the 'chaos' of the Yeltsin years behind but, as we move into 'Putin 3.0', the concerns of these chapters will remain critical both to Russia itself, and to Russia's relations with the wider world. This book was published as a special issue of *Europe-Asia Studies*.

**China and the Middle East** Feb 03 2020 This manuscript examines relations between China and the Middle East in historical context. It highlights some of the most important events that characterize the ties between China and the Middle East, and examines their relationship in key areas that include energy, trade, arms sales, culture and politics. The centre of China's relations with Israel is arms sales and advanced technology, while the core of Sino-Saudi relations is oil. Iran and China are tied with deep historical, civilizational, cultural and political relations, but China's current interests in Iran centre on oil. Relations between China and the United Arab Emirates (UAE) centre on trade. The UAE serve as a primary hub for Chinese business corporations not only in the

Gulf or the wider Middle East, but also in Africa and the world. China's relations with Algeria have been based on political co-ordination since the early days of the Algerian War of Independence and the early days of the People's Republic of China. China provided Algeria with political, diplomatic and military support to accomplish its national liberation from France. Since then, their partnership has developed. Finally, the book develops a tridimensional approach in which China's ties with Middle Eastern countries are viewed as an outcome of interaction between three actors in each situation. The book reaches the conclusion that China's national interests in the Middle East are only increasing, and it is anticipated that Sino-Middle Eastern relations and strategic partnerships will be enhanced in the near future, provided that China is not perceived as undermining the Arab Spring. Key Features Offers an in-depth analysis of Chinese-Middle Eastern relations Assists students and scholars in understanding the uniqueness of the Chinese model of engagement in the Middle East Explains why most Middle Easterners prefer China's engagement to Western engagement Explores the future of Sino-Middle Eastern relations

Ready Fire Aim: The Mainfreight Story Oct 25 2021 The lively, insider story of the rise and rise of New Zealand's most successful logistics company. This is the story of a company built on the belief that with passion anything is possible. As they say at Mainfreight, 'Go anywhere as long as it is forward'. Mainfreight was founded in 1977 by the visionary Bruce Plested, who set out to make the company a family, a team, where everyone has a share in the riches and where the word 'management' is banned. The Mainfreight instruction manual is short: Feel the fear but do it anyway. This is a world where budgets are deemed 'bullshit'. Why spend time preparing figures that are invariably out of date before the ink is dry? Just make more than last year. It's also a world based on

generosity: Mainfreight is the backing force behind Books in Homes, and offers tertiary scholarships to the children of all its employees. Did the rise to NZX sharemarket darling all go smoothly? Not for a minute. Initially there would be catastrophic ventures in Australia and America and finally a jaw-dropping moment in Europe when Don Braid and his team made their biggest purchase ever only to see most of the turnover and half the profit walk out the door. This book takes you on a warts-and-all exploration of Mainfreight's journey from small transport company at the bottom of the world to truly successful global logistics company.

Design Thinking Research Apr 18 2021 This book summarizes the results of Design Thinking

Research carried out at Stanford University in Palo Alto, California, USA and at the Hasso Plattner Institute in Potsdam, Germany. Offering readers a closer look at Design Thinking, its innovation processes and methods, the book covers topics ranging from how to design ideas, methods and technologies, to creativity experiments and wicked problem solutions, to creative collaboration in the real world, and the interplay of designers and engineers. But the topics go beyond this in their detailed exploration of Design Thinking and its use in IT systems engineering fields, or even from a management perspective. The authors show how these methods and strategies actually work in companies, introduce new technologies and their functions, and demonstrate how Design Thinking can influence such unexpected topics as marriage. Furthermore, readers will learn how special-purpose Design Thinking can be used to solve wicked problems in complex fields. Thinking and devising innovations are fundamentally and inherently human activities – so is Design Thinking. Accordingly, Design Thinking is not merely the result of special courses nor of being gifted or trained: it's a way of dealing with our environment and improving techniques, technologies and life.

**Decentring the West** Feb 14 2021 We live in a world where democracy is almost universally accepted as the only legitimate form of government but what makes a society democratic remains far from clear. Liberal democratic values are both relativized by the self-description of many non-democratic regimes as 'local' or 'culturally specific' versions of democracy, and undermined by the automatic labelling as 'democratic' of all norms and institutions that are modelled on western states. *Decentring the West: The Idea of Democracy and the Struggle for Hegemony* aims to demonstrate the urgent need to revisit the foundations of the global democratic consensus. By examining the views of democracy that exist in the countries on the semi-periphery of the world system such as Russia, Turkey, Bolivia, Venezuela, Brazil and China, as well as within the core (Estonia, Denmark

and Sweden) the authors emphasize the truly universal significance of democracy, also showing the value of approaching this universality in a critical manner, as a consequence of the hegemonic position of the West in global politics. By juxtaposing, critically re-evaluating and combining poststructuralist hegemony theory and postcolonial studies this book demonstrates a new way to think about democracy as a truly international phenomenon. It thus contributes groundbreaking, thought-provoking insights to the conceptual and normative aspects of this vital debate.

**Tied Aid and Development Aid Procurement in the Framework of EU and WTO Law** Jul 30 2019 This book is the first legal treatment of tied aid and examines in detail the compatibility of tied aid with EU and WTO law. The workings of the aid projects and aid procurement systems of donor countries granting bilateral aid are fully examined through case studies from the UK, Italy, the EU and the US. Tied aid refers to aid granted to developing countries on condition that goods and services for the aid-financed projects are purchased from the donor country only. The recipient country, in order to receive the grant or the loan, has no other choice but to fulfil the condition imposed by the donor. Economists have shown that tying aid undermines the effectiveness of aid. It leads to higher costs paid for the goods and services purchased and the distortion of the nature of the aid. Further, tying frustrates the potential of aid to foster trade between developing countries - in many of these countries public bodies and, in particular, aid-financed projects are major potential outlets for trade between neighbouring states. The importance of tied aid has been pointed out in economic literature but there is surprisingly little written on the legal aspects of tied aid practices and this book seeks to fill this major gap in the literature. The book is of interest to academics in the field of EU and WTO law, NGOs and practitioners working both in the field of public procurement and development policies.

*Shifting Global Powers and International Law* Nov 25 2021 This book explores the impacts of global economic, political and cultural shifts on various international legal frameworks and legal norms. The economic growth of states throughout Asia, South and Central America and Africa is having a profound effect on the dynamics of international relations, with a resulting impact on the operation and development of international law. This book examines the influence of emerging economies on international legal rules, institutions and processes. It describes recent and predicted changes in economic, political and cultural powers, flowing from the growth of emerging economies such as China, India, Brazil, South Africa and Russia, and analyses the influence of these changes on various legal frameworks and norms. Expert contributors drawn from a variety of fields, including international law, politics, environmental law, human rights, economics and finance, provide a broad analysis of the nature of the shifting global dynamic in its historical and contemporary contexts, and a range of perspectives on the impact of these changes as they relate to specific regimes and issues, including climate change regulation, collective security, indigenous rights, the rights of women and girls, environmental protection and foreign aid and development. The book provides a fresh and comprehensive analysis of an issue with extensive implications for international law and politics. *Shifting Global Powers and International Law* will be of interest to students and scholars of international relations; international law; international political economy, human rights; and development.

**Domestic Disturbances** Feb 26 2022 The issue of immigration is one of the most hotly debated topics in the national arena, with everyone from right-wing pundits like Sarah Palin to alternative

rockers like Zack de la Rocha offering their opinion. The traditional immigrant narrative that gained popularity in the nineteenth and twentieth centuries continues to be used today in describing the process of the "Americanization" of immigrants. Yet rather than acting as an accurate representation of immigrant experiences, this common narrative of the "American Dream" attempts to ideologically contain those experiences within a story line that promotes the idea of achieving success through hard work and perseverance. In *Domestic Disturbances*, Irene Mata dispels the myth of the "shining city on the hill" and reveals the central truth of hidden exploitation that underlies the great majority of Chicana/Latina immigrant stories. Influenced by the works of Latina cultural producers and the growing interdisciplinary field of scholarship on gender, immigration, and labor, *Domestic Disturbances* suggests a new framework for looking at these immigrant and migrant stories, not as a continuation of a literary tradition, but instead as a specific Latina genealogy of immigrant narratives that more closely engage with the contemporary conditions of immigration. Through examination of multiple genres including film, theatre, and art, as well as current civil rights movements such as the mobilization around the DREAM Act, Mata illustrates the prevalence of the immigrant narrative in popular culture and the oppositional possibilities of alternative stories.

Power Transition and International Order in Asia Jun 01 2022 This edited volume examines how the transition and diffusion of power in global politics is impacting on stability and order in Asia. Both in the academic field of International Relations (IR) and among policymakers, the big question today concerns the rise of China, the relative decline of the United States, and the increasing importance of Asia in global politics. The level of impact the international power transition will have in the region remains unclear, but observers agree that Asia is a potential tinderbox for crises and conflict. This volume brings together leading scholars from around the world to assess current thinking in IR

on these issues. The authors apply appropriate theories and methods of analysis in their specific area of expertise to examine the likely effects of the changing global power distribution on Asia. There is also said to be an ongoing diffusion of power away from states to non-state actors in the region; hence, in addition to examining changing relations between the Great Powers, the book will also assess the implications that other actors, from terrorist groups, insurgents and organised crime syndicates, could have on stability and order. This book will be of much interest to students of Asian politics, security studies, diplomacy and international relations.

**World Heritage Management and Human Rights** Jul 10 2020 This book focuses on the balance between protecting human rights and protecting world heritage sites. It concerns itself with the idea that the management of heritage properties worldwide may fail to adequately respect traditional entitlements and rights of individuals and communities living within or being affected by changes in the use of these spaces. It also explores the concept that the international heritage field has limited knowledge and awareness of this challenge. The volume argues that the dilemmas in question result from different conceptualisations of the key terms of 'rights', 'heritage' and 'community' among different groups and across political and cultural boundaries. In so far as 'culture' is what enables us to read the meanings involved, the ultimate questions are those that ask whose power is contested when one meaning is 'fixed' and the heritage of one group of humans is given the right to have its symbolic representation enjoyed and protected. The included case studies give vivid examples of this. This book was originally published as a special issue of the International Journal of Heritage Studies.

**Progressive Library Organizations** Jun 08 2020 This work presents the history and impact of the seven most important progressive library organizations worldwide--in Austria, Germany, South

Africa, Sweden, United Kingdom, and two in the United States. Each organization is considered within its national context, and in fact, the English word "organization" does not quite fit the nature of all of the groups. The South African organization, LIWO, was transitional in that it helped bring South African librarianship from apartheid to majority rule and then disbanded. The other organizations or their successors are still working in one form or another. Some of the organizations have had or continue to have vibrant local chapters, though many of the original activists have recently retired or died. The author has interviewed many of them at a time when they were assessing their life work, and handing off to new generations.

Hits and Misses in the Baseball Draft Dec 27 2021 If unpredictability is so much of what makes sports compelling, the baseball draft might be the best place to look. This book explores the intricate uncertainties of the draft and the people who face it. Since the modern draft began in 1965, major league teams have attempted, with varying degrees of success, to identify and develop stars of the future. Whether because of injury, poor performance or mental and physical struggles, a large percentage of the most ballyhooed prospects never reach the game's highest level. Though teams have improved in recent years at turning top picks into major leaguers, the baseball draft is still centered on educated guesswork. This book explains why.

**Metrology & Quality Control** Mar 06 2020 Metrology is the scientific study of measurement. It establishes a common understanding of units, crucial in linking human activities. The knowledge of this subject is essential for all persons irrespective of the branch of engineering. For engineering

purposes, the study is restricted to the measurement of lengths, angles and the quantities which are expressed in linear and angular terms. This book gives information about various instruments used for linear as well as angular measurements and corresponding errors. This book also includes concepts of quality, quality control, different tools and techniques for quality control, total quality management and various latest methods of quality control. Our hope is that this book, through its careful explanations of concepts, examples and figures bridges the gap between knowledge and proper application of that knowledge.
