Safety at Street Works and Road Works Nov 12 2020 This publication sets out the statutory requirements for signing, lighting, and guarding at street works and road works. This is the core reference manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). The code, which covers all of the UK and includes national variations, is now compulsory for highway/road authorities in England, Wales and Northern Ireland. It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts: Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for

pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles. Effective from 1 October 2014 when it will supersede the 2001 edition (ISBN 9780115519581).

FileMaker Pro: The Missing Manual approaches FileMaker the way FileMaker approaches you: it's user-friendly and seemingly straightforward enough, but it offers plenty of substance worthy of deeper exploration. Packed with practical information as well as countless expert tips and invaluable guidance, it's an in-depth guide to designing and building useful databases with the powerful and pliable FileMaker Pro. Covering FileMaker for both Windows and Macintosh, FileMaker Pro: The Missing Manual is ideal for small business users, home users, school teachers, developers--anyone who wants to organize information efficiently and effectively. Whether you want to run a business, publish a shopping cart on the Web, plan a wedding, manage a student information system at your school, or program databases for clients, this book delivers. Author Geoff Coffey has many years of experience using FileMaker Pro (he was, in fact, an early beta tester for the product). Author Susan Prosser is a FileMaker Certified Developer who trains other developers. Together, Coffey and Prosser show you how to: Get FileMaker up and running quickly and smoothly Import and organize information with ease Design relational databases that are simple to use, yet powerful Take advantage of FileMaker Pro calculation capabilities Automate processes with scripting Customize FileMaker Pro to your needs and preferences Share information with other people (coworkers, clients, and customers) and other programs Understand and select the best security options What could easily come across as dry and
