Enterprising Women Apr 15 2021 This book brings together new household and enterprise data from 41 countries in Sub-Saharan Africa to inform policy makers and practitioners on ways to expand women entrepreneurs' economic opportunities. Sub-Saharan Africa boasts the highest share of women entrepreneurs, but they are disproportionately concentrated among the self-employed rather than employers. Relative to men, women are pursuing lower opportunity activities, with their enterprises more likely to be smaller, informal, and in low value-added lines of business. The challenge in expanding opportunities is not helping more women become entrepreneurs but enabling them to shift to higher return activities. A central question addressed in the book is what explains the gender sorting in the types of enterprises that women and men run? The analysis shows that many Sub-Saharan countries present a challenging environment for women. Four key areas of the agenda for expanding women's economic opportunities in Africa are analyzed: strengthening women's property rights and their ability to control assets; improving women's access to finance; building human capital in business skills and networks; and strengthening women's voices in business environment reform. These areas are important both because they have wide gender gaps and because they help explain gender differences in entrepreneurial activities. It is particularly striking that while gender gaps in education tend to close with higher incomes, gaps in women's property rights and in women's participation in reform processes do not. As simply raising a country's income is unlikely to be sufficient to give women equal ability to control assets or have greater voice, more proactive steps will be needed. Practical guidelines to move the agenda forward are discussed for each of these key areas.

Marketing Aesthetics Sep 28 2019 There is no way to mistake the ubiquitous trademarked Coca-Cola bottle, or the stylish ads for Absolut Vodka with any of their competitors. How have these companies created this irresistible appeal for their brands? How have they sustained a competitive edge through aesthetics? Bernd Schmitt and Alex Simonson, two leading experts in the emerging field of identity management, offer clear guidelines for harnessing a company's total aesthetic output -- its "look and feel" -- to provide a vital competitive advantage. Going beyond standard traditional approaches on branding, this fascinating book is the first to combine branding, identity, and image and to show how aesthetics can be managed through logos, brochures, packages, and advertisements, as well as sounds, scents, and lighting, to sell "the memorable experience." The authors explore what makes a corporate or brand identity irresistible, what styles and themes are crucial for different contexts, and what meanings certain visual symbols convey. Any person in any organization in any industry can benefit from employing the tools of "marketing aesthetics." Schmitt and Simonson describe how a firm can use these tools strategically to create a variety of sensory experiences that will (1) ensure customer satisfaction and loyalty; (2) sustain lasting customer impressions about a brand's or organization's special personality; (3) permit premium pricing; (4) provide legal "trade dress" protection from competitive attacks; (5) lower costs and raise productivity; and (6) most importantly, create irresistible appeal. The authors show how to manage identity globally and how to develop aesthetically pleasing retail spaces and environments. They also address the newly emergent topic of how to manage corporate and brand identity on the Internet. Supporting their thesis with numerous real-world success stories such as Absolut Vodka, Nike, the Gap, Cathay Pacific Airlines, Starbucks, the New Beetle Website, and Lego, the authors explain how actual companies have developed, refined, and maintained distinct corporate identities that set them apart from competitors.

Wally Olins. Brand New. Oct 22 2021 What is the future for brands and branding? Does globalization mean that individuality will be crushed by massive multinationals? Or will there still be room for brands and places that trade on being different? With the rise of new markets in India, China, Brazil and elsewhere, will new global brands emerge based around local strengths and heritage? If so, what will this mean for the traditional dominance of brands based on Western cultural norms? Incisive, invigorating and visionary, this analysis of our fast-evolving global marketplace comes from the guru described by *The Financial Times* as 'the world's leading practitioner of branding and

identity'. No one interested in branding, marketing, business or contemporary culture will want to be without it. With his customary flair and no-nonsense prose, he analyzes the problems facing today's organizations, criticizes corporate misbehaviour where he finds it, praises those companies who seem to be building and sustaining brands successfully in our brave new world, and predicts the future of branding. The New Guide to Identity Jun 17 2021 It is, of course, commonplace for corporations to operate sophisticated identity programmes. But identity has now moved way beyond the commercial area. We live in a world in which cities, charities, universities, clubs - in fact any activity that involves more than two or three people - all seem to have identities too. However, very few of these organizations have released the full potential that effective management of identity can achieve. In this book, the world's leading authority on corporate identity shows how managing identity can create and sustain behavioural change in an organization as well as achieving the more traditional outcome of influencing its external audiences. The New Guide to Identity provides a simple clear guide to identity, including what it is and how it can be used to full effect. If a change of identity is required, the whole process is described from start-up (including investigation and analysis of the current identity), through developing the new identity structure, to implementation and launch. For anyone responsible for the identity of an organization, or for designing it for someone else, or attempting to achieve change in their organization, or studying the subject, this straightforward guide is essential reading.

Banking the World Jul 07 2020 Experts report on the latest research on extending access to financial services to the 2.5 billion adults around the world who lack it. About 2.5 billion adults, just over half the world's adult population, lack bank accounts. If we are to realize the goal of extending banking and other financial services to this vast "unbanked" population, we need to consider not only such product innovations as microfinance and mobile banking but also issues of data accuracy, impact assessment, risk mitigation, technology adaptation, financial literacy, and local context. In *Banking the World*, experts take up these topics, reporting on new research that will guide both policy makers and scholars in a broader push to extend financial markets. The contributors consider such topics as the complexity of surveying people about their use of financial services; evidence of the impact of financial services on income; the occasional negative effects of financial services on poor households, including disincentives to work and overindebtedness; and tools for improving access such as nontraditional credit scores, financial incentives for banking, and identification technologies that can dramatically reduce loan default rates.
