European Cases of the Reincarnation Type Sep 01 2022 Many cultures accept that a person may die and then come back to life in another form, but Westerners have traditionally rejected the idea. Recently, however, surveys conducted in Europe indicate a substantial increase in the number of Europeans who believe in reincarnation, and numerous claims of reincarnation have been reported. This book examines particular cases in Europe that are suggestive of reincarnation. The first section provides a brief history of the belief in reincarnation among Europeans. The second section considers eight cases from the first third of the twentieth century that were not independently investigated, but were reported and sometimes published by the persons concerned. The third section covers 32 cases from the second half of the twentieth century that were investigated by the author. Many of these cases involved either children who exhibited unusual behavior attributed to a previous life, or adults who experienced recurrent or vivid dreams attributed to a previous life. In the fourth section, the author compares European cases suggestive of reincarnation with those of other countries and cultures.

Type and Image Jan 31 2020 Type and Image The Language of Graphic Design Philip B. Meggs What is the essence of graphic design? How do graphic designers solve problems, organize space, and imbue their work with those visual and symbolic qualities that enable it to convey visual and verbal information with expression and clarity? The extraordinary flowering of graphic design in our time, as a potent means for communication and a major component of our visual culture, increases the need for designers, clients, and students to comprehend its nature. In this lively and lavishly illustrated book, the author reveals the very essence of graphic design. The elements that combine to form a design— sings, symbols, words, pictures, and supporting forms—are analyzed and explained. Graphic design’s ability to function as language, and the innovative ways that designers combine words and pictures, are discussed. While all visual arts share common spatial properties, the author demonstrates that graphic space has unique characteristics that are determined by its communicative function. Graphic designs can have visual and symbolic properties which empower them to communicate with deep expression and meaning. The author defines this property as graphic resonance and explains how it occurs. After defining design as a problem-solving process, a model for this process is developed and illustrated by an in-depth analysis of actual case histories. This book will provide insight and inspiration for everyone who is interested or involved in graphic communications. While most materials about form and meaning in design have a European origin, this volume is based on the dynamic and expressive graphic design of America. The reader will find inspiration, hundreds of exciting examples by many of America’s outstanding graphic designers, and keen insights in Type and Image.

Just My Type Oct 02 2022 Just My Type is not just a font book, but a book of stories. About how Helvetica and Comic Sans took over the world. About why Barack Obama opted for Gotham, while Amy Winehouse found her soul in 30s Art Deco. About the great originators of type, from Baskerville to Zapf, or people like Neville Brody who threw out the rulebook, or Margaret Calvert, who invented the motorway signs that are used from Watford Gap to Abu Dhabi. About the pivotal moment when fonts left the world of Letraset and were loaded onto computers ... and typefaces became something we realised we all have an opinion about. As the Sunday Times review put it, the book is 'a kind of Eats, Shoots and Leaves for letters, revealing the extent to which fonts are not only shaped by but also define the world in which we live.' This edition is available with both black and silver covers.

Getting it Right with Type Oct 29 2019 Typography is no longer the specialist domain of the typesetter: these days anyone who uses a computer has access to a wide range of typefaces and effects. This book offers an introduction to the basics of typography, including choosing which typeface to use; adjusting letter-, line-, and word-spacing for improved legibility; understanding kerning and leading; and mastering typographic details, such as italics, punctuation, and line endings. The book is illustrated throughout with practical examples demonstrating good and bad solutions. There are tips for specific design tasks, such as letters, charts, tables, and design for the screen, and a glossary explaining typographic terms.

Types Sep 08 2020 This book is based on two new nominalistic theses: first, that material things (houses, cats, people, symphonies, and also hair, milk, red, and love) are recurrent types, and second, that things are ontologically incomplete. Using these ideas, simple solutions are offered to a plethora of questions in ontology, philosophy of mind, and aesthetics.

Regularity of Free Boundaries in Obstacle-type Problems Apr 15 2021 The regularity theory of free boundaries flourished during the late 1970s and early 1980s and had a major impact in several areas of mathematics, mathematical physics, and industrial mathematics, as well as in applications. Since then the theory continued to evolve. Numerous new ideas, techniques, and methods have been developed, and challenging new problems in applications have arisen. The main intention of the authors of this book is to give a coherent introduction to the study of the regularity properties of free boundaries for a particular type of problems, known as obstacle-type problems. The emphasis is on the methods developed in the past two decades. The topics include optimal regularity, nondegeneracy, rescalings and blowups, classification of global solutions, several types of monotonicity formulas, Lipschitz, C^{α} , as well as higher regularity of the free boundary, structure of the singular set, touch of the free and fixed boundaries, and more. The book is based on lecture notes for the courses and mini-courses given by the authors at various locations and should be accessible to advanced graduate students and researchers in analysis and partial differential equations.

Bugatti Type 57 Grand Prix Jul 31 2022 A comprehensive, radical look at the history and development of the Type 57 Grand Prix Bugattis. New material challenges traditional beliefs about these historic cars, and rejects some long-standing conventions. Myths are explored and truths are revealed in a book celebrating all aspects of these remarkable cars and their creators. **305 Lost Buildings of Canada** May 17 2021 The legacies of theaters, hotels, fire stations, flour mills, and more -- torn down, burned down, and otherwise lost -- are uncovered in this bittersweet collection. Using archival photographs, blueprints, and written reports, Raymond Biesinger has rendered a selection of Canada's most iconic lost buildings in his signature minimalist style. Accompanying Biesinger's illustrations are Alex Bozikovic's descriptions which capture each building's historical, cultural, and architectural significance. Bozikovic draws on local histories, archived building permits and his own extensive knowledge of the Canadian urban architectural landscape and its history -- from the letters passed through Kelowna's unlikely art deco post office to the destruction of a home in Halifax's Africville -- to offer fascinating, sometimes forgotten stories about each building and its significance. An impossible architectural walking tour, 305 Lost Buildings of Canada spans the country, its cities and countryside, and its history. Cities change, buildings come and go, but in this fact-filled compendium, you'll find the lost wonders of Canada's architecture.

BR Swindon Type 1 0-6-0 Diesel-Hydraulic Locomotives - Class 14 Feb 11 2021 In 1957 the Western Region of BR identified a need for 400 Type 1 diesel locomotives for short-haul freight duties but it was 1964 before the first was introduced. General-purpose Type 1s were being delivered elsewhere but WR management regarded these as too expensive for their requirements. After completion of design work on the ‘Western’ locomotives, Swindon turned to creating a cheap ‘no-frills’ Type 1. At 65% of the cost of the Bo-Bo alternative, the Swindon 0-6-0 represented a better ‘fit’ for the trip-freight niche. Since 1957 the privatised road-haulage industry had decimated BR’s wagon-load sector; whilst the 1962 Transport Act released BR from its financially-debilitating public-service obligations, the damage had been done, and the 1963 Beeching Plan focused on closing unprofitable routes and associated services. By 1963 the original requirement for 400 Type 1s had been massively reduced. Fifty-six locomotives were constructed in 1964/65. Continuing traffic losses resulted in the whole class becoming redundant by 1969. Fortuitously, a demand for high-powered diesels on the larger industrial railway systems saw the bulk of the locomotives finding useful employment for a further twenty years. This book covers the life of these locomotives on British Railways; a companion volume will provide an extensive appraisal of “Their Life in Industry” for the forty-eight locomotives which made the successful transition after withdrawal from BR

The Type-Writer Girl Oct 22 2021 Juliet Appleton is an officer’s daughter who is forced to make her own way in the world after her father’s death. Having been trained in typewriting and shorthand, she obtains employment at a law office, only to find that she cannot bear to work with her unpleasant colleagues and employer. Juliet possesses some of the characteristics of the infamous “New Woman”: she has attended Girton College, she smokes cigarettes, and she travels the countryside on her bicycle. After various adventures, Juliet finds a new opportunity as a type-writer girl for a publishing company. She falls in love with her employer, and he with her, but complications inevitably ensue. At the end of the nineteenth century, the

Canadian-born Grant Allen was a prolific professional author of popular science texts on evolution as well as a fiction writer. The Type-Writer Girl (1897) is one of only two novels he wrote under a female pseudonym, possibly to lend credibility to his first-person female narrator. The Type-Writer Girl invokes tensions typical of the fin de siècle concerning evolution, technology, and the role of women. This Broadview edition provides a reliable text at a very reasonable price. It contains textual notes but no appendices.

[Anger Management, Types I and II](#) May 05 2020 I've been a practicing psychologist in an outpatient setting for over thirty-two years. I run into the same conditions or "issues" almost every day (addictions, anxiety, ADHD/learning disabilities, assertiveness, children's behaviors, mood disorders, relationships and self-esteem). Anger management is important unto itself, but plays a very strong role in the other areas. Usually, when people can control their anger, the problems in each of these groups diminish. Anger management is a skill that everyone needs and uses to some degree, in just about every situation. This webpage contains information about my ebook on this subject, anger management techniques, anger management tips and anger management training. It turns out anger management can be taught to almost everyone. I've taught it to children, as well as adults. I've taught techniques to schizophrenics and to people with out-of-control mood disorders. Anyone can learn about this subject and anyone can learn to manage anger. You may be having trouble in your relationship, or blowing up at work. You may be referred by the courts, which happens if your anger leads to excessive drinking or fighting, custody issues, etc.. I've read most of the pop-psychology literature on anger management over the last 30 (+) years. Many of the books are excellent. They, like this ebook deal with a variety of anger management aspects. Anger has to do with being out of control of reactions, or about being out of touch with feelings. Type I anger people "lose it" and act out. Type II anger people lose it and "act in." Type I anger people explode, while Type II anger people implode. There are characteristics and symptoms of each, which I list and explore. Type II anger is a NEW concept. You won't find this described anywhere else, because its my original idea. People have a long list of reasons not to control their anger, which is addressed. There are lots of popular or other internet sources for anger management techniques. I list them. These work, sort of, and if they work for you--good. Your anger problem is not that serious. But there are deeper, psychological approaches that fix, not mollify the problem. To effectively manage anger (either Type I or Type II), one has to get to the "deep stuff." Most of the pop-psychology books are too long. I've boiled down the concepts in these books into clear, manageable steps. I've made this as easy to understand as is humanly possible, combining what I've read with what I've learned from clients. Plus, there is a discussion on the newest ways to conceptualize anger mismanagement, relative not just to psychology, but to cognitive behavioral techniques and mindfulness. Like my other ebooks, this one has no fat. Think of it as a "Cliffs Notes" publication. It's "sort of" a quick read (about an hour or two). I have to explain a few new terms, because there are new ideas and the terms you probably already know are put together in new ways. The theory I espouse is different from standard "behavior change" books. It works better and is very simple to understand. That's the point of an ebook. My research has not turned up another ebook that does what mine does.
