What Would You Do If You Could Learn Anything 3 Times Faster? In our rapidly changing and information-driven society, the ability to learn quickly is the single most important skill. Whether you're a student, a professional, or simply embarking on a new hobby, you are forced to grapple with an every-increasing amount of information and knowledge. We've all experienced the frustration of an ever-growing reading list, struggling to learn a new language, or forgetting things you learned in even your favorite subjects. This Book Will Teach You 3

Major Skills: Speed reading with high (80%+) comprehension and understanding  
Memory techniques for storing and recalling vast amounts of information quickly and accurately  
Developing the cognitive infrastructure to support this flood of new information long-term  
However, the SuperLearning skills you'll learn in this course are applicable to many aspects of your every day life, from remembering phone numbers to acquiring new skills or even speaking new languages. Anyone Can Develop SuperLearning Skills  
This course is about improving your ability to learn new skills or information quickly and effectively. We go far beyond the kinds of "speed reading" (or glorified skimming) you may have been exposed to, diving into the actual cognitive and neurological factors that make learning easier and more successful. "This book should be the go-to reference for anyone looking to upgrade their mind's firmware!" -Benny Lewis, Language Learning Expert  
Learn How to Absorb and Retain Information in a Whole New Way - A Faster, Better Way  
The Authors' Proprietary Method for Teaching Speed Reading & Memory Improvement  
You may have even taken a normal speed reading course in the past, only to realize that you didn't retain anything you read. The sad irony is that in order to properly learn things like speed reading skills and memory techniques in the past, you had to read dozens of books and psychological journals to decode the science behind it. Or, you had to hire an expensive private tutor who specializes in SuperLearning. That's what I did. And it changed my life. Fortunately, my co-authors (experts and innovators in the fields of superlearning, memory improvement, and speed reading) agreed to help me transform their materials into the first ever digital course. Over 25,000 satisfied students later, we have transformed our course into a book you can enjoy anywhere. Our teaching methodology relies heavily on at-home exercises. The chapters themselves are only part of what you're buying. You will be practicing various exercises

and assignments on a regular basis over the course a 7 week schedule. In addition to the lectures, there are hours of supplemental video and articles which are considered part of the curriculum. Don't take another class until you've read it!" -Dr. Anthony Metivier, Author & Memory Expert If you wish to improve memory and concentration, learn more effectively, read faster, and learn the techniques of memory champions - look no further! An awesome read that will push the limits of your brain. Levi does an incredible job of guiding you through, to bring your brain from average to UNSTOPPABLE!" -Nelson Dellis, 4-Time USA Memory Champion

**Be Extraordinary** May 17 2021 Some people can get over anything. Doctors diagnose them with a rare form of cancer and they recover. They are viciously attacked and blinded yet pull through to start a successful business improving other people's lives. They survive injury in the military, and campaign across the country to raise awareness about the emotional difficulties linked to combat service. These people bounce back from horrendous trauma that would emotionally and physically cripple most people. They flourish with renewed resolve to face any problem with grace and ease. Knowing how people in challenging circumstances such as these transition from ordinary to extraordinary gives us the knowledge to transform our own lives without first suffering trauma. **Be Extraordinary** reveals a life-changing formula that will lead us on the path to being extraordinary even when we encounter setbacks along the way. Jennifer Wild has discovered that overcoming adversity and becoming extraordinary tap the same factor. People who flourish with or without trauma as their catalyst naturally draw on seven key processes - the unwavering belief in recovering against all odds, the conviction to reach one's goals, the courage to focus on the future rather than the past, and the invaluable, necessary conscious and continuous process of updating out-dated

memories and self-concepts. These factors drive people to overcome adversity. They drive people to become extraordinary. Some people have them. Some people don't. This book is about what those factors are, how to get them and why they work. Linking science to achievable transformation, Dr Wild reveals the seven processes and gives inspiring real-life examples of how ordinary people have used them to come through astonishing adversity. Offering an accessible, practical no-nonsense plan of how to overcome everyday setbacks, this is the essential guide if you want to Be Extraordinary.
