**Social Class in Applied Linguistics** Mar 07 2021 In this ground breaking new book David Block proposes a new working definition of social class in applied linguistics. Traditionally, research on language and identity has focused on aspects such as race, ethnicity, nationality, gender, religion and sexuality. Political economy, and social class, as an identity inscription, have been undervalued. This book argues that increasing socioeconomic inequality, which has come with the consolidation of neoliberal policies and practices worldwide, requires changes in how we think about identity and proposes that social class should be brought to the fore as a key construct. Social Class in Applied Linguistics begins with an in-depth theoretical discussion of social class before considering the extent to which social class has been a key construct in three general areas of applied linguistics- sociolinguistics, bi/multilingualism and second language acquisition and learning research. Throughout the book, Block suggests ways in which social class might be incorporated into future applied linguistics research. A critical read for postgraduate students and researchers in the areas of applied linguistics, language education and TESOL.

**Teaching and Learning English in East Asian Universities** Jun 29 2020 The 25 chapters contained in this book were all written by scholars working in the field of applied linguistics and English language teaching in various East Asian contexts. East Asia is large and diverse in terms of socio-economic, linguistic, and ethnic parameters. Statistics alone cannot give a clear understanding of what goes on in rural and urban universities and what challenges English language teachers and learners face in those contexts. To understand this wide gamut of issues in English language teaching in East Asia is thus a very large undertaking. The book addresses some of these issues, arranging its 25 chapters into five sections: namely, Assessing Language Performance; Teaching English Writing; Learner Autonomy; Corpus and Discourse Research; and Learning English in East Asian Contexts. Many of the chapters in this volume concern familiar topics such as linking assessment to teaching, learning and curriculum; conducting assessment validation research; examining meta-cognitive strategies; investigating teaching and learning English for academic purposes; and profiling prevailing word lists for language learners. Other chapters are on novel or lesser known topics such as non-verbal delivery in speaking assessment; the use of visualization as a reading strategy; learner strategies in a Facebook corpus; effects of discourse signaling cues and rate of speech; and an ontogenetic analysis of college English textbooks. Collectively, these chapters showcase English language learning, teaching, and assessing in a range of contexts using a variety of methods and techniques to deal with issues relevant to East Asian teachers, learners and researchers.
