Simple Trading Strategies That Work Jan 31 2020 Do you believe there are patterns in the financial markets that can be taken advantage of? What if you could see patterns in the financial markets that less than 1 in 1000 day traders were aware of? I'll never forget the first time I (Richard) lost significant money in trading. It was early 2010 and I bought TLT after it had taken a significant run up. After I bought it, it began to decline almost daily for the next month. When the pain was more than I could bear, I sold it, locking in what for me was a huge loss. To pile on, not long after I sold it, TLT reversed course and began to rise. Why did I buy TLT when I did? Because of certain things I saw in the charts, and macroeconomic considerations. I was very wrong. Our background is physics, and physicists like to understand what's going on underneath the hood when they observe a system evolving. For things like the stock market and bonds, economics seems to be a place to start. But this is often only true in the long run, and as Keynes said, "In the long run, we're all dead". So to prevent the TLT fiasco from happening again, we decided to answer the question, "Is there a systematic way to profit in the financial markets, using an algorithm, so that the computer tells us when to buy and sell?" At least it would alleviate some of the emotional burden, and maybe even produce profits. This is our motivation, remove emotion and discretion from trading, while simultaneously being profitable. The approach we have taken in this quest is a search for patterns. For flexibility and applicability, we keep our assumptions to a minimum. This book isn't for everyone. Here are 4 reasons why you may decide not to buy this book: You don't believe there are patterns in the financial markets that can be used to trade profitably. You don't like thinking quantitatively, and you don't know a thing about programming (programming is useful to go beyond the simplest strategies). You want to continue to lose money like most other traders. You're happy to run with the herd and do what everyone else is doing. Here is what Perry Kaufman, author of "New Trading Systems and Methods" has said about a previous version of this ebook: "One of the basic principles of trading is that certain events cause predictable price reactions. In many cases, related markets react the same way. Stefan and Richard Hollos have written an extremely clear book on how to identify and profit from these moves. Although this falls short of giving us the perfect system, it does give us tools and understanding that every serious trader should have. It will make you look at the markets differently. It's a fast read and I recommend it." The strategies revealed in this book do not require large amounts of historic data, and can be implemented on any time scale. They say that to solve a difficult problem, sometimes all you need is a change in perspective. This book provides a view of financial data you won't find elsewhere.
