**The ARVN and the Fight for South Vietnam Feb 26 2022** With the withdrawal of French forces from South Vietnam in 1955, the U.S. took an ever-widening role in defending the country against invasion by North Vietnam. By 1965, the U.S. had "Americanized" the war, relegating the Army of the Republic of Vietnam (ARVN) to a supporting role. While the U.S. won many tactical victories, it had difficulty controlling the territory it fought for. As the war grew increasingly unpopular with the American public, the North Vietnamese launched two large-scale invasions in 1968 and 1972--both tactical defeats but strategic victories for the North that precipitated the U.S. policy of "Vietnamization," the drawdown of American forces that left the ARVN to fight alone. This book examines the maturation of the ARVN, and the major battles it fought from 1963

to its demise in 1975. Despite its flaws, the ARVN was a well-organized and disciplined force with an independent spirit and contributed enormously to the war effort. Had the U.S. "Vietnamized" the war earlier, it might have been won in 1967-1968.

***Ending the U.S. War in Iraq Jun 08 2020*** Ending the U.S. war in Iraq required redeploying 100,000 military and civilian personnel; handing off responsibility for 431 activities to the Iraqi government, U.S. embassy, USCENTCOM, or other U.S. government entities; and moving or transferring ownership of over a million pieces of property in accordance with U.S. and Iraqi laws, national policy, and DoD requirements. This book examines the planning and execution of this transition.

**Open Data and Energy Analytics May 08 2020** Open data and policy implications coming from data-aware planning entail collection and pre- and postprocessing as operations of primary interest. Before these steps, making data available to people and their decision-makers is a crucial point. Referring to the relationship between data and energy, public administrations, governments, and research bodies are promoting the construction of reliable and robust datasets to pursue policies coherent with the Sustainable Development Goals, as well as to allow citizens to make informed choices. Energy engineers and planners must provide the simplest and most robust tools to collect, process, and analyze data in order to offer solid data-based evidence for future projections in building, district, and regional systems planning. This Special Issue aims at providing the state-of-the-art on open-energy data analytics; its availability in the different contexts, i.e., country peculiarities; and its availability at different scales, i.e., building, district, and regional for data-aware planning and policy-making. For all the aforementioned reasons, we encourage researchers to share their original works on the field of open data and energy analytics. Topics of primary interest include but are not limited to the following: 1. Open data and energy sustainability; 2. Open data science and energy planning; 3. Open science and open governance for sustainable development goals; 4. Key performance indicators of data-aware energy modelling, planning, and policy; 5. Energy, water, and sustainability database for building, district, and regional systems; 6. Best practices and case studies.

**I Will Surely Multiply Your Offspring Sep 23 2021** After creating man and woman, God's first recorded blessing upon them is "be fruitful and multiply." Like the blessings of food and health, the human experience of procreation is so common that we may overlook its importance within the biblical narrative. However, *I Will Surely Multiply Your Offspring*, a comprehensive examination of the progeny blessing, demonstrates that this motif is both prevalent and significant within the Old Testament by tracing its development throughout the redemptive-historical narrative. Viands identifies different progeny blessing traditions associated with the Abrahamic covenant, the Sinai covenant, and the new covenant, and describes their interrelationships as well as their relationship to the universal blessing first found in Genesis 1. This study lays the foundation for a biblical worldview of human proliferation, contributing to contemporary discussions concerning whether humans are obligated to bear children as well as procreation ethics.

**Boom! Jan 04 2020** Irrespective of the outcome of a controversial Champions League final, 2017/18 had already proved an historic and scintillating season in Europe for Liverpool FC; smashing the competition's record for the most goals in a single season, as the Reds racked up almost 50. As money increasingly dominates the Premier League landscape, Jürgen Klopp proved once again that he can take undervalued resources and create a thrilling team, centred around the joyous interplay of Mo Salah, Roberto Firmino and Sadio Mané. Liverpool were 40-1 outsiders at the outset, with a team of misfits, rejects, journeymen and discards, who, it transpired, just needed the right coaching and direction. This is the story of an eventful season, with a slow, difficult start, and where, at the halfway point, the club was forced to sell its 'best' player, yet went from strength to strength. Boom! is the story of this exciting campaign as told in rich and varied ways by fans at the games, and by The Tomkins Times' coterie of acclaimed writers and authors. Paul Tomkins is the author of over a dozen football books, an academic paper on the role football finances play in success, and the novel "The Girl on the Pier". Chris Rowland is the editor of The Tomkins Times, and the author of "From Where I Was Standing: A Liverpool Supporter's View of the Heysel Stadium Tragedy" Daniel Rhodes, deputy editor of TTT, has edited several of The Tomkins Times' books, and contributes to the Anfield Index podcast. Andrew Beasley is a freelance football writer who has written for several leading football websites, and been part of TTT since its inception in 2009. "The Tomkins Times is an indispensable website whose diagnosis of all things Liverpool is beyond compare." LFCHistory.com

**Teach Yourself Programming With Java™ in 24 Days. Jul 02 2022** Essential Java Skills--Made Easy! What Special - In this book I covered and explained several topics of latest Java 8 Features in detail for Developers & Fresher's, Topics Like- Lambdas. || Java 8 Functional interface, || Stream and Time API in Java 8. This Java book doesn't require previous programming experience. However, if you come from a C or C++ programming background, then you will be able to learn faster. Learn the all basics and advanced features of Java programming in no time from Bestseller Java Programming Author Harry. H. Chaudhary (More than 1,67,000 Books Sold !). This Java Guide, starts with the basics and Leads to Advance features of Java in detail with thousands of Java Codes and new features of Java 8 like Lambdas. Java 8 Functional interface, || Stream and Time API in Java 8. , I promise this book will make you expert level champion of java. Anyone can learn java through this book at expert level. The main objective of this java book is not to give you just Java Programming Knowledge, I have followed a pattern of improving the question solution of thousands of Codes with clear theory explanations with different Java complexities for each java topic problem, and you will find multiple solutions for complex java problems. Engineering Students and fresh developers can also use this book. This book covers common core syllabus for all Computer Science Professional Degrees If you are really serious then go ahead and make your day with this ultimate java book. First Part- Teach you how to compile and run a Java program, shows you everything you need to develop, compile, debug, and run Java programs. And then discusses the keywords, syntax, and constructs that form the core of the Java language. After that it leads you to advanced features of java, including multithreaded programming and Applets. Learning a new language is no easy task especially when it's an oop's programming language like Java. You might

think the problem is your brain. It seems to have a mind of its own, a mind that doesn't always want to take in the dry, technical stuff you're forced to study. The fact is your brain craves novelty. This Java Book is very serious java stuff: A complete introduction to Java. You'll learn everything from the fundamentals to advanced topics, if you've read this book, you know what to expect--a visually rich format designed for the way your brain works. To use this book does not require any previous programming experience. However, if you come from a C/C++ background, then you will be able to advance a bit more rapidly. As most readers will know, Java is similar, in form and spirit, to C/C++. Thus, knowledge of those languages helps, but is not necessary. Even if you have never programmed before, you can learn to program in Java using this book. Inside Contents (Chapters): 1. (Overview of Java) 2.(Java Language) 3.(Control Statements) 4.(Scanner class, Arrays & Command Line Args) 5.(Class & Objects in Java) 6.(Inheritance in Java) 7.(Object oriented programming) 8.(Packages in Java) 9.(Interface in Java) 10.(String and StringBuffer) 11.(Exception Handling) 12.(Multi-Threaded Programming) 13.(Modifiers/Visibility modes) 14.(Wrapper Class) 15.(Input/Output in Java) 16.(Applet Fundamentals) 17.(Abstract Windows Toolkit)(AWT) 18.(Introduction To AWT Events) 19.(Painting in AWT) 20.( java.lang.Object Class ) 21.(Collection Framework) PART - II (Java 8 Features for Developers) 22. Java 8 Features for Developers - Lambdas. 23. Java 8 Functional interface,Stream & Time API. 24. Key Features that Make Java More Secure than Other Languages.

**Cost Accounting** Jan 16 2021 This dynamic text provides a practical, real-world approach to cost accounting, including substantial coverage of recent developments. **COST ACCOUNTING, 12TH** provides the essential background for those who will use accounting information as well as those who will prepare it. This edition continues the book's successful framework with early chapters devoted to thorough treatment of the elements of cost. Planning and control are recurring themes throughout the text as the authors provide special attention to decision-making and human behavioral considerations.

Using an exam-friendly format, Electrical Engineering Quick Reference logically organizes all the formulas and data from the Electrical Engineering Reference Manual that are likely to be used during the exam. Many exam problems can be solved using the Electrical Engineering Quick Reference alone. If you require more information, you can quickly refer to the Reference Manual as formulas and data are fully indexed for rapid retrieval. Electrical Engineering Quick Reference has been updated to the 8th edition of the Electrical Engineering Reference Manual and covers the topics found on the Power, Electrical and Electronics, and Computer PE exams. Electrical Engineering Quick Reference saves you precious exam time by • Putting the data you need the most at your fingertips • Isolating the most useful equations and formulas in the Reference Manual • Allowing you to quickly retrieve formulas without the distraction of surrounding text • Cross-referencing additional information to the Reference Manual

**Israel and the Covenants in New Testament Times Aug 23 2021** A Bible student reference A New Testament prophecy of a falling away from truth into apostasy and lawlessness, in the final generation before Jesus Christ returns in glory, is being fulfilled now and is shortly to end. Yet Christianity has overwhelmingly moved so far from its first century roots that it could not even recognise this - or that Christ's return is therefore now almost upon us! How and why this is the case is here explained thoroughly and logically with many examples directly from the word of God. In God's saving plan for the world, everyone must in time make a free will choice to become part of the 'Israel of God' in order to access eternal life in the kingdom of God. The route to take is the "strait and narrow" way (Mat 7:13-14) that very few have so far found, and it involves the biblical new and old covenants which both apply to this Israel. Embark on this voyage only if you are willing to: be challenged about some basic Christian

preconceptions, be a serious open-minded Bible student, and trust what the Bible teaches - but remember that time is short. "What the Bible has taught me I see as both vital and urgent for our eternal salvation; yet I know of no church or individual theologian who teaches what this book deals with in any substantive way" "Be prepared for major challenges to your understanding just as God has challenged me." "In the epistles, Paul refers to two Israels whom he calls Israel after the flesh (I Cor 10:18) and the Israel of God (Gal 6:16); I focus mainly on the latter (but I also explain an unexpected but critically important connection between them)" "Dependent on the teaching, nearly all Christian denominations either teach nothing at all on it or almost the opposite of what Scripture repeatedly showed me. Looking back, I find this absolutely staggering!" "Very few [Christians] understand that the new covenant also only applies to Israel (as I will clearly show)." "I no longer believe that the NT [New Testament] can be fully understood without this extra Israel dimension" "Had I felt I could deliver this in a more light-hearted way I would have done so, but its implications are too awesome and fundamental to our eternal life prospects for that"
