**Aleut Grammar** May 02 2020 The aim of this grammar is to analyze in some detail the mechanisms of the Aleut language as represented by older speakers and by earlier sources, and is intended for both students of Aleut and linguists in general. An introductory chapter gives background on the language's history, linguistic documentation, Aleut dialects, and outside influences. Subsequent chapters address these topics: phonology (phonemes, phonotactics, internal and external sandhi, contours, and expressive features); morphology (inflection and word classes, derivation/postbases); and syntax (subject and predicate, object, oblique terms, addition and removal of terms, construction of indefiniteness, noun phrases, temporal adverbials, verb phrases, conjoined predicates, clauses of purpose, linked clauses, anterior, conditional, participle clauses, report clauses, sentence connections). Some crucial structural differences from the cognate Eskimo language are discussed in the final chapter. (Contains 52 references.) (MSE)

**From One to Zero** Oct 26 2019 "Traces the development of numerical systems in Sumerian, Egyptian, Greek, Roman, Chinese, Babylonian, and Mayan cultures, and examines the origins of the Hindu-Arabic numerals we use today"--Back cover.

[Labor and Monopoly Capital](#) Sep 29 2022 This widely acclaimed book, first published in 1974, was a classic from its first day in print. Written in a direct, inviting way by Harry Braverman, whose years as an industrial worker gave him rich personal insight into work, *Labor and Monopoly Capital* overturned the reigning ideologies of academic sociology. This new edition features an introduction by John Bellamy Foster that sets the work in historical and theoretical context, as well as two rare articles by Braverman, "The Degradation of Work in the Twentieth Century" (1975) and "Two Comments" (1976), that add much to our understanding of the book.
