Reading for Wonder Jul 02 2022 In a world awash in awesome, sensual technological experiences, wonder has diverse powers, including awakening us to unexpected ecological intimacies and entanglements. Yet this deeply felt experience—at once cognitive, aesthetic, and ethical—has been dangerously neglected in our cultural education. In order to cultivate the imaginative empathy and caution this feeling evokes, we need to teach ourselves and others to read for wonder. This book begins by unfolding the nature and artifice of wonder as a human capacity and as a fabricated experience. Ranging across poetry, foodstuffs, movies, tropical islands, wonder cabinets, apes, abstract painting, penguins and more, *Reading for Wonder* offers an anatomy of wonder in transmedia poetics, then explores its ethical power and political risks from early modern times to the present day. To save ourselves and the teeming life of our planet, indeed to flourish, we must liberate wonder from ideologies of enchantment and disenchantment, understand its workings and their ethical ambivalence, and give it a clear language and voice.

That Sense of Wonder Nov 13 2020 How to reclaim wonder in our lives and achieve the good life. All of us experience a sense of wonder at some point in our lives. Perhaps you felt it when you experienced

your first kiss; when you grasped the perfectly balanced beauty of an equation; or when you first saw the rose windows of Chartres Cathedral? Whatever the circumstances that triggered the feeling, you were left speechless by this extraordinary world of ours. We may speak different languages, cling to different ideas about politics, religion and love – but a longing for wonder connects us all through space and time. Wonder is the impulse behind scientific and philosophical inquiry, artistic creativity and spiritual yearning. It is the most fruitful human sense: firing our curiosity; inspiring us to hope and dream. But our sense of wonder – that feeling we had as children seeing the Milky Way for the first time – gets used up. Faced with the practical demands of adulthood, we trade a sense of wonder for a sense of reality, which all too often brings anxiety and unhappiness in its wake. By exploring the nature of wonder in many areas of human experience, from the natural world to the spirit world, from science to storytelling, Francesco Dimitri reveals how we can reclaim our sense of wonder – not to become children again, but to become happier and more fulfilled adults, better equipped to face the challenges of modern life.
