A Sea Monster's Tale Jul 24 2019 There are few marine creatures as spectacular as the Basking Shark. At up to 11 metres in length and seven tonnes in weight, this colossal, plankton-feeding fish is one of the largest in the world, second only to the whale shark. Historically, Basking Sharks were a familiar sight in the northern hemisphere – off the coasts of Norway, Scotland, Ireland, Canada and the USA, for example. In an 18th Century world without electricity, they became the focus of active hunting for their huge livers containing large amounts of valuable oil, primarily used in lamps. Catch numbers were small enough to leave populations largely intact, but during the 20th Century a new breed of hunter joined the fray, some driven as much by a need for adventure as for financial gain. With improved equipment and experience, they exploited the shark on an industrial scale that drastically reduced numbers, leading to localised near-extinction in some areas. From the 1970's onward a new generation took to the seas, this time with conservation in mind to identify where the shark might still be found in the waters around the British Isles, employing new technologies to solve long-standing mysteries about the behaviour of this elusive creature. Using the best of both old and new research techniques, the case was built to justify the species becoming one of the most protected sharks in the oceans. Today, the Basking Shark is a much-loved cornerstone of our natural heritage. There are positive signs that the population has stabilised and may even be slowly recovering from the damage of the past, proving that timely conservation measures can be effective. Join us on a journey amidst wild seas, places, people and conservation history in the battle to protect this iconic creature – a true sea monster's tale.

Sailing to Treasure Island Jan 22 2022 Legendary sailor Captain J. C. Voss meets a mysterious man in his hotel in Victoria, British Columbia in 1897. The mystery man says he knows where tons of gold and jewels are buried on the remote Cocos Island. Voss takes a 35-foot sailing sloop seven thousand miles through gales in search of the pirate Treasure of Lima worth seven million pounds sterling in 1897 or over \$200 million today. *This is an edited, abridged, and annotated version of the first section of the *Venturesome Voyages of Captain Voss* concerning the voyage of the XORA sloop. This is the only part of that work focused on treasure hunting. *In the 2018 edition, the text is extensively edited as the first edition from 1913 had many run-on sentences and poor subject and verb agreement. *A biography of the great mariner Captain J.C. Voss is written by the editor. *Frequent footnotes and an editor's note put the text in historic context. *This is an abridged version of the *VENTURESOME VOYAGES OF CAPTAIN*

VOSS. This abridged version focuses exclusively on the cruise of the sailboat XORA and treasure hunting aboard it. Most of the VENTURESOME VOYAGES OF CAPTAIN VOSS is about the voyage of the sailing canoe named TILIKUM. Below are some selections from the book: "My seafaring life commenced in the year 1877, when I was quite a young man. Up to the time that I sailed in the Xora, it was spent in large sailing vessels. During this period, I have filled all sorts of positions from deck boy up to master. Throughout all those years, I would certainly not have believed that a vessel so small as the Xora could live through a heavy gale at sea. Naturally enough, I should not have thought of attempting a long sea voyage in any small craft if it not been for a gentleman, whose name was George Haffner, an American citizen. In the summer of 1897, when I was sitting comfortably in an easy chair in the Queen's Hotel, Victoria, British Columbia, a gentleman stepped up to me, saying, "Are you Captain Voss?" I replied in the affirmative. He then introduced himself as Mr. Haffner, handing me at the same time a letter, saying that it was from an old friend of mine, whose death had taken place at sea just fourteen days previously, and with whom he had stayed during his last moments." "...The bearer of this note is Mr. George Haffner, who knows the position where the great treasure lies on Cocos Island. Believe in him, and he will make you a rich man. Excuse my short note, because I am very weak. Kindly remember me to all my old friends and believe me. Your dying friend, JIM DEMPSTER" Captain Voss is one of the early pioneers of long-distance sailboat cruising. He is the first major author in the genre of the sailing narrative to write about his travels under sail after Captain Joshua Slocum. He is more famous for his 40,000-mile voyage in a sailing canoe named TILIKUM, but this treasure hunting adventure under sail is a book that will delight all readers. Oxriver Publishing produces titles of interest to sailboat cruising enthusiasts. This is an annotated and modernized version of Captain Voss' classic account in the VENTURESOME VOYAGES OF CAPTAIN VOSS, which includes an editor's note and biography of John C. Voss by Dr. Linus Wilson. The editor is the creator of the Slow Boat Sailing YouTube Channel and Podcast as well as the author of several sailing books.

Sailing Made Easy Oct 26 2019 *Sailing Made Easy* is the first step in a voyage that will last you the rest of your life. It is a gift from a group of dedicated sailing professionals who have committed their lives to sharing their art, their skill, and their passion for this wonderful activity. This book, which *Sailing Magazine* called "best in class" upon its release in 2010, is the most comprehensive education and boating safety learn-to-sail guide to date. It is also the official textbook for the ASA Basic Keelboat Standard (ASA 101). Incorporated in the textbook are useful illustrations and exceptional photographs of complex sailing concepts. The text's most distinguishing feature is its user friendly "spreads" in which instructional topics are self-contained on opposing pages throughout the book. There are also chapter end quizzes and a glossary to help those new to sailing to navigate their way through the extensive nautical terminology.

Cape Horn May 14 2021 "Having raced twice around the world myself, I can appreciate the stresses and trials that Jeff has endured traversing the Southern Ocean and rounding iconic Cape Horn. His writing conveys a great Corinthian spirit of adventure, and is a tribute to all the sailors that have dared this passage. In human history it wasn't so long ago that rounding Cape Horn was akin to going to the moon, and many never returned. Jeff brings that spirit of adventure to the pages of this book." -Bruce Schwab, *Around Alone Racer* "Sailing around Cape Horn alone is not everyone's "Milk shake." I had decided to do it because after 60,000 miles of sailing ocean passages they were becoming too familiar. My wife Debbie and I had sailed clear of Ecuador and down to Peru. It was on that passage that I realized just how close to the Horn I was and realized I just needed to give it a "Shot". Debbie felt no need to try it so she volunteered to become my shore side support. Now most people don't realize the problems of going West to East around the "Horn", and I was one of them. With nearly 45-years of sailing experience under my keels and *Sailors Run* a 40ft. *Baba Ketch*, I felt confident that the 5,000 NM

passage was doable. What I did not know is that the worst storms occur in the summer season. I also learned that the Humboldt Current runs up the coast of Chile at nearly two-knots. The wind also comes up from the south, so you must set sail from Peru heading SW and eventually you will end up 1,000 NM off of Chile (at 45° South) before you can start your run in towards the "Horn". You experience a severe low just about every three days with storm force winds. Anyone who thinks going West to East is easy, best try it before they make that claim. In this book, you will not only experience what it takes to sail in the Southern Ocean, but you will get an in-depth look into the life of a sailor who had to overcome insurmountable "road blocks" to live out his dream, a life of freedom upon the sea.

Living the Dream Aug 17 2021 About our Book *Living the Dream* is the true-life adventure story of our seven-year cruise from Newport, Oregon, to Phuket, Thailand in the 35-foot steel-hulled sailboat, *Tainui*. This book gives a true picture of what it's really like for a retired couple to live their dream of full time cruising to far away places: the highs of beautiful sailing days, snorkeling off pristine coral, anchoring in tropical lagoons, exotic cultural experiences, and the fellowship of the cruising community--but also fear in storms, the exhaustion of sleepless night watches, discouragement of endless boat maintenance, and a rusting through of *Tainui's* hull. Although we wrote *Living the Dream* for a general audience, serious sailors will find a wealth of helpful cruising information and steel boat owners will profit from our significant learning experiences in our maintenance of *Tainui's* steel hull. About us We began our lives far apart--Connie in parts of California that were far from the sea and with no aspirations to cross oceans and Vern in the busy seaport city of Seattle dreaming of sailing away some day. We eventually met at the University of Washington, married, started our family and careers--Vern as a social worker and Connie as a teacher. It was our four years of living with our family in Malaysia while Vern was on the staff of the Peace Corps there that sparked our desire to one day be full time world travelers. Between France and New France Apr 12 2021 *Between France and New France* is an absorbing look at life abroad the sailing vessels which plied the North Atlantic during the French colonial era in North America. Focusing on the first half of the eighteenth century and the Seven Years' War period, this book analyses four major aspects of the crossing: maritime traffic and the outfit of vessels; the Atlantic course and navigation; the people and their occupations; and life aboard the ship. Together they present a fascinating view of sea life. Gilles Proulx has used official correspondence between the Minister of marine and the Canadian colonial authorities, and the papers seized on boarded vessels, as well as over one hundred log-books and personal diaries, to obtain a wealth of detail about the rigours of the colonial shipboard experience. In addition, many photographs, both colour and black and white, have been included to illustrate this exciting period in Canadian history.

Sail to Freedom Sep 25 2019 Turn the dream into reality. If you dream of running away to sea in your own boat and sailing over the horizon to find a new life, then read on. Since moving aboard their yacht in 1984 the authors have cruised 25,000 relaxed, even hedonistic miles, and the lessons they have learned - both practical and psychological - are described within these pages. This book is not aimed at the would-be circumnavigator (although it has much to interest him) but at the weekend sailor for whom the annual fortnight's cruise is never long enough. It matters little whether you plan to escape for six months, a couple of years or forever. Nor does it matter if your destination is the Mediterranean, the Caribbean or the Great Barrier Reef: this book is still for you. June and Bill Raper are long-standing members of the (British) Cruising Association and have recently attained Commodore status of the (US) Seven Seas Cruising Association. In these pages they hope to pass on the benefit of their extensive experience to those already planning to sail away, as well as to many who are still at the dreaming stage.

Merchant Sailing Ships, 1775-1815 Jan 28 2020

Sailing the Wine-Dark Sea Sep 05 2020 NATIONAL BESTSELLER • The bestselling author of *How the Irish Saved Civilization* takes us on a journey through the landmarks of art and bloodshed that defined

Greek culture nearly three millennia ago. “A triumph of popularization: extraordinarily knowledgeable, informal in tone, amusing, wide ranging, smartly paced.” —*The New York Times Book Review* In the city-states of Athens and Sparta and throughout the Greek islands, honors could be won in making love and war, and lives were rife with contradictions. By developing the alphabet, the Greeks empowered the reader, demystified experience, and opened the way for civil discussion and experimentation—yet they kept slaves. The glorious verses of the *Iliad* recount a conflict in which rage and outrage spur men to action and suggest that their “bellicose society of gleaming metals and rattling weapons” is not so very distant from more recent campaigns of “shock and awe.” And, centuries before Zorba, Greece was a land where music, dance, and freely flowing wine were essential to the high life. Granting equal time to the sacred and the profane, Cahill rivets our attention to the legacies of an ancient and enduring worldview.

The Gentleman's Guide to Passages South Mar 12 2021 This is the Tenth and last Edition of the popular directions for sailing south to the Bahamas and the Caribbean. For more than twenty years Van Sant repeatedly surveyed nearly 200 anchorages between Florida and South America. He racked up well over 80,000 sea miles doing it, mostly single-handed. Why? You'll find some interesting answers in his book of stories, *Margarita Cat*, but essentially, he did it because he liked doing it. Sailing up and down the chain of islands so much and so often, he got to looking for shorter and easier ways to navigate between each link in the chain, and he kept refining detailed nav plans for every leg. He has systematically taken the thorns out of the route they used to call the Thorny Path. For example, he exploits the calming effects on wind and sea which result from land cooling on each side of an inter-island passage. Applying his many methods, both sail and power can make safe, comfortable and pleasant progress even against normally impenetrable trade winds and seas. *Passages South* offers an illustrated manual of instruction for specific passages and harbors down islands as well as a cruising guide for the Greater Antilles islands of Hispaniola and Puerto Rico. It has sailed aboard tens of thousands of boats passaging between the Americas. It should sail with you too.

The three authors, who have each voyaged thousands of miles with children on board, provide a factual and balanced look at the realities of family life on the sea. From their own experience and with information from interviews with dozens of other voyaging parents, they discuss caring for an infant on board, handling the changing needs of children as they grow, education options, ensuring parents find the private time to keep their relationships in tune, and helping children make the eventual transition back to shore life. Added to the authors’ voices are sidebars from other cruising parents with specialized information on subjects as diverse as handling special diets and how your children can keep in touch with friends around the world. A unique bonus chapter, written by a dozen former cruising kids, looks at the long-term effects of breaking away from shoreside normalcy. A substantial appendix of

resources provides valuable further information on the subjects covered in this book. It is said that every parent inflicts their lifestyle choices on their children. Read this book to find why heading out to sea with your children may be the most rewarding infliction of all.

Seven at Sea Sep 29 2022 A New York City family's remarkable story of how they gave up their urban life, packed up their family of seven--the youngest, a six-year-old with Down syndrome--and braved the difficult conditions of the Atlantic Ocean as they sailed more than 2,500 miles from New York to and around the Caribbean. They thought of all the reasons why risking everything for a year at sea was a bad idea: They could go broke, get injured, be stranded at sea--maybe even die. More than likely, the only thing they would accomplish would be to embarrass themselves. Besides, only rich people sailed the world, right? Not a NYC theater family with five kids who would serve as the ship's entire crew. After all the deliberations, one thing was clear: their children would either be an excuse or a reason. They chose to set sail. Their journey proved to be a life-changing experience as they grew closer as a family and explored the world in a new way. They traveled to twenty-three islands, spanning eleven countries and territories, and got a hands-on global education while meeting new people and appreciating a variety of cultures. They experienced the beauty and fragility of the earth as well as the vastness and power of the sea. Working together as a family and a sailboat crew meant learning how to tackle hard challenges together, helping each other improve their skills, and exercising patience when difficult conditions emerged. *Seven at Sea* tells the story of a family learning to live together, simply and in harmony with the natural world. In doing so, they learned that giving up control can sometimes lead to amazing adventures. More importantly, they discovered how little they actually needed to be abundantly happy.

Sailing Rock Art Boats Feb 08 2021 This book argues that the use of sail as a complement to paddling would have formed an integral part of the development of centres of power in the early Scandinavian Bronze Age, permitting more frequent communication, and thus helping to expand, maintain and control power. This argument stands in sharp contrast to the current belief that the introduction of the sail in the North occurred between the 7th or 8th and the 10th centuries AD. This reassessment of the potential timing and development in the use of the sail derives mainly from an examination of the Bronze Age rock art (c. 1800-500 BC) in southern Scandinavia containing imagery of boats with attributes that can be interpreted as masts and sails, in combination with experimental sail trials in Bronze Age type boats, and using early sailing in ancient Egypt and Oceania as a backdrop.
