Gifted Lives Nov 25 2021
This book reveals the dramatic stories of twenty outstandingly gifted people as they grew from early promise to maturity in Britain. Recorded over the last thirty-five years by award-winning psychologist, Joan Freeman, these fascinating accounts reveal the frustrations and triumphs of her participants, and investigates why some fell by the wayside whilst others reached fame and fortune. These exceptional people possess a range of intellectual, social and emotional gifts in fields such as mathematics, the arts, music and spirituality. Through their particular abilities, they were often confronted with extra emotional challenges, such as over-anxious and pushy parents, teacher put-downs, social trip-wires, boredom and bullying in school and conflicting life choices. Their stories illustrate

how seemingly innocuous events could have devastating life-long consequences, and confront the reader with intriguing questions such as: Does having a brilliant mind help when you are ethnically different or suffering serious depression? How does a world-class pianist cope when repetitive strain injury strikes, or a young financier when he hits his first million? What is the emotional impact of grade-skipping? Joan Freeman's insights into the twists and turns of these lives are fascinating and deeply moving. She shows us that while fate has a part to play, so does a personal outlook which can see and grab a fleeting chance, overcome great odds, and put in the necessary hard work to lift childhood prodigy to greatness. There is a gap between the enormous need for counseling services and research about the counseling needs of gifted individuals, on the one hand, and the limited availability of such services and knowledge on the other. This book is designed to give counselors, classroom teachers, gifted education specialists, and parents an understanding of the academic and social-personal needs of gifted and talented students, awareness of ways that they themselves may help these children, and an introduction to the available guidance strategies and materials. This book highlights the role of regular

classroom teachers and teachers of the gifted in counseling; provides teachers, counselors, and parents with information about the wide variety of approaches to enrichment and/or acceleration; emphasizes the major role of parents in the development of their gifted children; stresses career education and guidance. Four chapters are devoted to important topics that have received very little attention to date-gifted girls, preschool gifted, disadvantaged gifted, and learning-disabled gifted. Finally, a unique feature of the book is a chapter in which fictional portraits of gifted and creative children are presented and analyzed.

Gifted Children Sep 04 2022 In this fascinating book, Ellen Winner uncovers and explores nine myths about giftedness, and shows us what gifted children are really like. Using vivid case studies, Winner paints a complex picture of the gifted child. Here we meet David, a three-year-old who learned to read in two weeks; KyLee, a five-year-old who mastered on his own all of the math concepts expected by the end of elementary school; and Nadia, an autistic and retarded "savant" who nevertheless could draw like a Renaissance master. Winner uses her research with these and several other extraordinary children, as well as the latest biological and psychological evidence, to debunk the many myths about academic, musical, and artistic giftedness. Gifted Children also looks at the role played by schools in fostering exceptional abilities. Winner castigates schools for wasting resources on weak educational programs for the moderately gifted. Instead, she advocates elevating standards for all children, and focusing our resources for gifted education on those with extreme abilities—children who are left untouched by the kinds of minimal programs we have today.

Although there are many factors that contribute to achievement, achievement-oriented students exhibit four key traits: they believe that they have the skills to perform well, they expect that they can succeed, they believe what they are doing is meaningful, and they set realistic expectations and implement strategies to successfully complete their goals. The Drama of the Gifted Child Jun 20 2021

Why are many of the most successful people plagued by feelings of emptiness and alienation? This wise and profound book has provided thousands of readers with an answer—and has helped them to apply it to their own lives. Far too many of us had to learn as children to hide our own feelings, needs, and memories skillfully in order to meet our parents' expectations and win their "love." Alice Miller writes, "When I used the word 'gifted' in the title, I had in mind neither children who receive high grades in school nor children talented in a special way. I simply meant all of us who have survived an abusive childhood thanks to an ability to adapt even to unspeakable cruelty by becoming numb...

Without this 'gift' offered us by nature, we would not have survived." But merely surviving is not enough. *The Drama of the Gifted Child* helps us to reclaim our life by discovering our own crucial needs and our own truth.

The Gifted Child in Peer Group Perspective Jun 28 2019

An Applied Psychologist's Initiation to the Study of Gifted Children My interest in the subject matter of this book, the peer relations of gifted children, intensified enormously as result of my involvement with one gifted child during my days as a school psychologist. At that time, I served a number of

schools in a prosperous suburb. I spent most of my time working with children with behavioral and learning disorders. I received very few requests to assist gifted youngsters and their teachers, perhaps because, at that point, I was not very sensitive to their needs. One autumn I was involved in something from which I derived a great deal of satisfaction—helping the teachers of a very advanced retarded boy with Down's syndrome maintain himself in a regular first-grade class. In retrospect, the achievements of this student, Jeff, would have justified my calling him exceptionally bright, given the limits of his endowment. I was interrupted from my observation of Jeff's success in class by a phone call from another school, one to which I had not previously been summoned. I was asked to discuss the case of an intellectually gifted child who was bored, moody, difficult, and disliked by those around him.
