Translanguaging with Multilingual Students Dec 29 2019 Looking closely at what happens when translanguaging is actively taken up

to teach emergent bilingual students across different contexts, this book focuses on how it is already happening in classrooms as well as how it can be implemented as a pedagogical orientation. It extends theoretical understandings of the concept and highlights its promises and challenges. Using a Transformative Action Research design, six empirically grounded ethnographic case studies describe how translanguaging is used in lesson designs and in the spontaneous moves made by teachers and students during specific teaching moments. The cases shed light on two questions: How, when, and why is translanguaging taken up or resisted by students and teachers? What does its use mean for them? Although grounded in a U.S. context, and specifically in classrooms in New York State, *Translanguaging with Multilingual Students* links findings and theories to different global contexts to offer important lessons for educators worldwide.

By offering a flexible step by step approach this book helps EAL teachers to: identify learners' individual needs teach grammar and vocabulary support teaching through speaking and listening assess pupils to inform future planning The programme also contains emergency lessons to support learners in the first three days, cross curricular links, ways of using a home-school learning book and an opportunity for the child to make a booklet about themselves. Transformative Pedagogical Perspectives on Home Language Use in Classrooms Feb 08 2021 Linguists, researchers, and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners' self-identities and national identities is ongoing. In fact, even with decades of research in home language use in the classroom, there are still classrooms worldwide where learners are deprived of the opportunity of building their self-esteem, confidence, and autonomy by communicating with their native language. The global nature of communication requires speakers to use all the languages in their repertoire effectively, thus reinforcing the need to encourage home language use in classrooms. Transformative Pedagogical Perspectives on Home Language Use in Classrooms is a cutting-edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner. Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills. In addition, the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self-identity and national identity. Highlighting topics such as engineering education, cultural responsiveness, and transformative pedagogy, this book is essential for linguists, academicians, education professionals, curriculum designers, policymakers, administrators, instructional designers, researchers, and students.

The Learning and Teaching of Reading and Writing Jul 24 2019 This book provides a unique description of teacher-pupil interaction during the Literacy Hour in good schools. It is based on detailed observations in inner-city primary schools that were recognised as effective and improving. The analysis is informed by contemporary research into the development and teaching of early literacy. The book provides practice-based examples of how teachers and schools might adapt their delivery for literacy as they move to greater creativity in their teaching of reading and writing. The analysis begins within the classrooms of three expert Key Stage 1 teachers and broadens out in to the wider setting of the schools and their senior management teams. An important theme running throughout the book is how the three teachers were able to make exceptional provision for their pupils, who were largely second language speakers and from socio-economically disadvantaged groups. The teachers' successful practice grew from their understanding of both early literacy development and planning for individual need. The information in this book will enable student teachers, recently qualified teachers, and teachers interested in enhancing their literacy teaching to develop their practice in a similarly successful way.

Recently, you have found a steady stream of learners coming to your school with little or no English. You aren't really sure how to provide the best possible education for them, when they are struggling to understand the English in your already differentiated lessons. This book provides you with a programme for use as an induction-to-English, complete with integral assessment. It provides guidance on how to bridge the gap between these learners and their peers. It is suitable for learners of any language background (including those not literate in their home language) due to the focus on learning through images. It also includes suggestions on how to include parents who are new to English and ideas on family learning. You'll find an EAL framework to provide structure to your EAL provision across the school, as well as guidance on how to approach class teaching. Developed from good practice in schools and informed by research, this programme is designed to move learners into English quickly. It uses a visual, structured approach that works alongside immersion in the mainstream.

Primary Language Lessons Sep 29 2022 The object of this little volume is to lead children of the second and third grades into the habit of speaking and writing the English language correctly. To accomplish this, the author has prepared a drill book which emphasizes the reproduction of many of the short stories current in our literature, and also introduces practice exercises to familiarize the pupils with correct forms. Beginning with simple, graduated exercises, they are continued till a general principle is inductively reached. It is assumed that the child will learn to speak and write correctly, by imitation, if the proper forms are presented to him. Accordingly much attention is given in this book to expressions frequently misused, as for example, troublesome verb forms. The lessons are designed, as well, to awaken and sustain children's interest in natural objects, and to put them in sympathetic relations with living things. The author has written from the standpoint of the child, and in language that the child can readily comprehend.
