Romagnoli e romagnolacci Nov 27 2019 Vittorio Emiliani
racconta vivacemente incontri, scontri, battute, bizzarrie, la

romagnolità latente o esplosiva dei suoi personaggi, molti dei quali spesso ignoti al di fuori del loro paese o borgo: pescatori, artigiani, birocceai, cavallari, pittori di carri agricoli. Più di cento ritratti di quei romagnoli che l'autore ha conosciuto o soltanto incrociato sul suo cammino, come Sergio Zavoli, Tonino Guerra, Marco Pantani, Arrigo Sacchi, Serafino Ferruzzi, Raul Gardini, i tanti Mussolini. Tanti pezzi di storia e di microstoria romagnola che compongono un mosaico vivacissimo, a volte drammatico, di vite vissute fra Ottocento e Novecento, fino ai giorni nostri, fra l'Appennino e il mare Adriatico, lungo la Via Emilia e le altre strade romane di quella che fu la Romània o la Romandìola.

Native Wine Grapes of Italy Aug 24 2019 Mountainous terrain, volcanic soils, innumerable microclimates, and an ancient culture of winemaking influenced by Greeks, Phoenicians, and Romans make Italy the most diverse country in the world of wine. This diversity is reflected in the fact that Italy grows the largest number of native wine grapes known, amounting to more than a quarter of the world's commercial wine grape types. Ian D'Agata spent thirteen years interviewing producers, walking vineyards, studying available research, and tasting wines to create this authoritative guide to Italy's native grapes and their wines. Writing with great enthusiasm and deep knowledge, D'Agata discusses more than five hundred different native Italian grape varieties, from Aglianico to Zibibbo. D'Agata provides details about how wine grapes are identified and classified, what clones are available, which soils are ideal, and what genetic evidence tells us about a variety's parentage. He gives historical and anecdotal accounts of each grape variety and describes the characteristics of wines made from the grape. A regional list of varieties and a list of the best producers provide additional guidance. Comprehensive,

thoroughly researched, and engaging, this book is the perfect companion for anyone who wants to know more about the vast enological treasures cultivated in Italy.

The Other Italy Mar 12 2021 Italy possesses two literary canons, one in the Tuscan language and the other made up of the various dialects of its many regions. The Other Italy presents for the first time an overview of the principal authors and texts of Italy's literary canon in dialect. It highlights the cultivated dialect poetry, drama, and narrative prose since the codification of the Tuscan literary language in the early sixteenth century, when writing in dialect became a deliberate

and conscious alternative to the official literary standard. The book offers a panorama of the literary dialects of Italy over five centuries and across the country's regions, shedding light on a profoundly plurilingual and polycentric civilization. As a guide to reading and research, it provides a compendium of literary sources in dialect, arranged by region and accompanied by syntheses of regional traditions with selected textual illustrations. A work of extraordinary importance, *The Other Italy* was awarded the Modern Language Association of America's Aldo and Jean Scaglione Publication Award for a Manuscript in Italian Literary Studies. It will serve scholars as an indispensable resource book for years to come.

Gender from Latin to Romance Sep 25 2019 This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin. Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard; he draws on data from the Middle Ages to the present from all the Romance languages and dialects, discussing examples from Romanian to Portuguese and crucially also focusing on less widely-studied varieties such as Sursilvan, Neapolitan, and Asturian. The investigation first reveals that several varieties display more complex systems than the binary masculine/feminine contrast familiar from modern French or Italian. Moreover, it emerges that traditional accounts, whereby neuter gender was lost in the spoken Latin of the late Empire, cannot be correct: instead, the neuter gender underwent a range of different transformations from Late Latin onwards, which are responsible for the different systems that can be observed

today across the Romance languages. The volume provides a detailed description of many of these systems, which in turns reveals a wealth of fascinating data, such as varieties where 'husbands' are feminine and others where 'wives' are masculine; dialects in which nouns overtly mark gender, but only in certain syntactic contexts; and one Romance variety (Asturian) in which it appears that grammatical gender has split into two concurrent systems. The volume will appeal to linguists from a range of backgrounds, including Romance linguistics, historical linguistics, typology, and morphosyntax, and is also of relevance to those working in sociology, gender studies, and psychology.
