Learning and Applying SolidWorks 2013-2014 Nov 25 2019 This unique reference is intended to help users learn SolidWorks on their own with little or no outside help. Unlike other books of its kind, it begins at a very basic level and ends at a fairly advanced level. It has been updated to include all new features of SolidWorks 2013 - 2014, including two new chapters; Introduction to Flow Analysis and Introduction to Formulas and Equations. And it's perfect for anyone enrolled in Engineering and Technology programs, as well as professionals interested in learning SolidWorks.

Robotic Systems: Concepts, Methodologies, Tools, and Applications Feb 27 2020 Through expanded intelligence, the use of robotics has fundamentally transformed a variety of fields, including manufacturing, aerospace, medicine, social services, and agriculture. Continued research on robotic design is critical to solving various dynamic obstacles individuals, enterprises, and humanity at large face on a daily basis. Robotic Systems: Concepts, Methodologies, Tools, and Applications is a vital reference source that delves into the current issues, methodologies, and trends relating to advanced robotic technology in the modern world. Highlighting a range of topics such as mechatronics, cybernetics, and human-computer interaction, this multi-volume book is ideally designed for robotics engineers, mechanical engineers, robotics technicians, operators, software engineers, designers, programmers, industry professionals, researchers, students, academicians, and computer practitioners seeking current research on developing innovative ideas for intelligent and autonomous robotics systems.

Comprehensive typology for food and nutrition security interventions, with application to the rural territories of the Democratic Republic of the Congo (DRC) Oct 25 2019 In this paper we develop a policy-relevant typology using different intervention types and nutrition constraints. Our approach is based on an amendable demarcation of areas within a four-indicator diagram, each of which represents a core dimension of food and nutrition security (FNS), which makes our typology conceptually sound, operationally flexible, and less data intensive. The derived typology is applied to rural territories of the Democratic Republic of the Congo (DRC). Despite a continuum of heterogenous development challenges across the country, the typology helped identify various clusters of territories which suffer mostly from production, access, and utilization constraints. Consequently, for the nine territories (out of 145) with the highest child stunting levels, we identified four broad intervention zones and studied the efficiency profile in more detail.

Roberts & Zuckerman's Criminal Evidence Sep 23 2019 Roberts and Zuckerman's Criminal Evidence is the eagerly-anticipated third of edition of the

market-leading text on criminal evidence, fully revised to take account of developments in legislation, case-law, policy debates, and academic commentary during the decade since the previous edition was published. With an explicit focus on the rules and principles of criminal trial procedure, Roberts and Zuckerman's Criminal Evidence develops a coherent account of evidence law which is doctrinally detailed, securely grounded in a normative theoretical framework, and sensitive to the institutional and socio-legal factors shaping criminal litigation in practice. The book is designed to be accessible to the beginner, informative to the criminal court judge or legal practitioner, and thought-provoking to the advanced student and scholar: a textbook and monograph rolled into one. The book also provides an ideal disciplinary map and work of reference to introduce non-lawyers (including forensic scientists and other expert witnesses) to the foundational assumptions and technical intricacies of criminal trial procedure in England and Wales, and will be an invaluable resource for courts, lawyers and scholars in other jurisdictions seeking comparative insight and understanding of evidentiary regulation in the common law tradition.
