[Saudi Arabia in a Multipolar World](#) Jun 20 2019 The Kingdom of Saudi Arabia has established itself as the twelfth-largest economy in the world, the largest West Asian economic power, world's largest oil producer, and a strong and capable force in international politics, particularly in the Sunni Islamic world. However, at present it is at crossroads. Should it continue as a 'kingdom' or usher in the process of inclusive political representation? This volume answers such questions and explores how the state is coping with domestic, regional and global developments to remain relevant in the changing times. It provides a holistic overview of a slew of economic, political, cultural, military and security policy measures that have been initiated by the government. The work also offers a detailed analysis of Saudi Arabia's relations with three significant powers — USA, China and India — and how they are evolving under new geopolitical and geostrategic dynamics. This book will interest strategists, policymakers, researchers and students of international relations, geopolitics, political science and political economy as well as the informed reader.

*Wiener Chic* Oct 29 2022 Vienna may not be synonymous with fashion like its metropolitan counterparts Paris and Milan, but it is a fashionable city, one that historically has been structured by changing fashions and fashionable appearances. Like the Litfaßsäule in Orson Welles's 1949 urban noir masterpiece *The Third Man*, into which Harry Lime escapes in order to avoid capture and which hapless visitors today presume are merely surfaces for advertising, there are many overlooked aspects of Vienna's distinct style and attitude. By focusing on fashion, *Wiener Chic* narrates Vienna's history through an interpretation of the material dimensions of Viennese cultural life - from architecture to arts festivals to the urban fabric of street chic. The first book that connects Vienna and fashion with urban theory, *Wiener Chic* draws on material that is virtually unknown in an English-language context to give readers an insider's vantage point on an under-appreciated European fashion capital.

Politics of Visibility and Belonging May 24 2022 In this book, Edenborg studies contemporary conflicts of community as enacted in Russian media, from the 'homosexual propaganda' laws to the Sochi Olympics and the Ukraine war, and explores the role of visibility in the production and contestation of belonging to a political community. The book examines what it is that determines which subjects and narratives become visible and which are occluded in public spheres; how they are seen and made intelligible; and how those processes are involved in the imagination of communities. Investigating the differentiated consequences of visibility, Edenborg discusses what forms of visibility make belonging possible and what forms of visibility may be related to exclusion or violence. The book maps and analyses the practices and mechanisms whereby a state seeks to produce and shape belonging through controlling what becomes visible in public, and how that which becomes visible is seen and understood. In addition, it examines what forms contestation can take and what its effects may be. Advancing theoretical understanding and offering a useful way to analytically conceptualize the role of visibility in the production and contestation of political communities, this work will be of interest to students and scholars of gender and sexuality politics, borders, citizenship, nationalism, migration and ethnic relations.

This book makes the case for greater resilience in European society in the face of the growing pervasiveness of surveillance. It examines surveillance in Europe from several different perspectives, including: the co-evolution of surveillance technologies and practices the surveillance industry in Europe the instrumentality of surveillance for preventing and detecting crime and terrorism social and economic costs impacts of surveillance on civil liberties resilience in Europe's surveillance society. the consequences and impacts for Europe of the Snowden revelations findings and recommendations regarding surveillance in Europe Surveillance in Europe's interdisciplinary approach and accessible content makes it an ideal companion to academics, policy-makers and civil society organisations alike, as well as appealing to top level undergraduates and postgraduates.

Europeanisation of Private Enforcement of Competition Law Oct 25 2019 This book argues that the European integration process (Europeanisation) is pushing the member states and candidate countries toward a greater convergence with the EU's competition acquis. Through the transposition of the Directive 2014/104/EU, the member states have harmonised substantive and procedural rules, which is beneficial to individuals and enterprises because it provides a minimum protection across all member states. In addition, it is commonly agreed in academia that the prospect of EU membership brings positive domestic changes in the candidate countries. At the moment, Albania is waiting to open negotiations for the chapters of the EU acquis. Firstly, this book addresses the evolution of private enforcement at the European level by examining

the objectives, modalities, and actors that contributed to the development of private enforcement. Secondly, it analyses the Directive 2014/104/EU and how the three selected EU member states have transposed the directive into their domestic legal system considering the discretion margin left by Article 288 TFEU and a minimum harmonisation level defined in the directive. Thirdly, it provides a historical overview of private enforcement in Albania and shows how the Albanian Competition Authority has addressed the transposition of the Directive 2014/104/EU.

**Sustainable Value Chain Management** Jun 25 2022 This book introduces the integrated management concept of "Sustainable Value Creation", which delivers sustainability 'inside-out' from the core business. It is based on the premise that sustainability can provide a platform for growth, if it is implemented in a company's products, services and supply chains (combined also known as the 'Value Chain'). Managing the Value Chain from the outset with a sustainability mindset subsequently allows profitable economical, ecological and societal growth. It combines the need for increased sustainability and its implementation in the operations of a company. The book addresses the following issues: How do economic, environmental and societal factors impact the value-creation process of a company? What requirements and expectations need to be met to balance economic, ecologic and societal value creation? What are the building blocks and measures that can be utilized on the journey towards building a sustainable value chain? What benefits can be achieved through sustainable value chains? What are the practical examples of sustainable value chains in leading companies that can inspire others to follow? The book includes contributions from the following organisations and companies: Beiersdorf, SAP, Klenk und Hoursch, VAUDE, Infineon Technologies, Independent Capital Management, BASF, Nanogate, the Federal German Council for Sustainable Development, Henkel, Symrise, shared.value.chain, Siemens, Fairphone and Thin Air Factory

*Vision and Visual Perception* Feb 21 2022 Vision is about insight, and visual perception is about cognition - and they form the foundation of how we see the world. Duco A. Schreuder, a physicist and psychologist, explores the finer details of each in this groundbreaking book that explores human consciousness and perception. Sharing virtually everything he's learned over a varied career spanning more than sixty years, he examines a wide array of topics, including how we understand what we visually process, how we store and retrieve information, the role that neurons play in how what we see, and much more. While Schreuder isn't afraid to disagree with other leading thinkers, he relies on science and focuses on the facts behind it so you can understand lighting, visual perception, engineering design, and applied and experimental physics. Looking is about insight, whereas seeing is about knowledge, and you need to know how each one works to truly understand how humanity views the world. Whether you're an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline, you'll be well served by taking a closer look at Vision and Visual Perception.
