[Children's Educational Book: Junior Vincent Van Gogh](#) Aug 08 2020 ABOUT THE 'SMART READS for Kids' BOOK SERIES "Love Art, Love Learning" Welcome to the 'SMART READS for Kids' book series. Designed to expand and inspire young minds; this is a range of short educational books for children aged seven and over. These books do much more than just teach children about Art and Artists. They also act as a gateway to a much broader general knowledge base. Although one Artist's life and major works are always the central theme, wider learning is encouraged in the following ways: • Geography. When locations relevant to the Artist's life are mentioned they are always accompanied by a colourful, child-friendly map so that the opportunity to learn some world geography does not pass the young reader by. • History. If the Artist's actions or inspirations were based on the current affairs of the day then a snippet of history is explained in simple terms than can be easily understood by children. • Vocabulary. In general the vocabulary is uncomplicated. However, a manageable number of longer words are intentionally introduced and then reused in each book. These are always demarked by bright bold colours and are accompanied by a clear definition and pronunciation. There is also a Glossary at the end. • Maths. At least one maths sentence, for example a calculation of the Artist's age or how many years ago they were born, is included in each book. A column subtraction sum to accompany the statement is always laid out somewhere nearby. • Concentration. Each book is written in the friendly first person and a trail of footprints running through it always leads to a cute cartoon animal at the end. The author sometimes asks questions of the young reader (and the final section is always a quiz). These features both keep children engaged in the book and encourage them to form their own opinions. There is intentionally a high ratio of images to text. • Other Artists. No artist lives in isolation; they are invariably influenced by their peers and those that have come before them. Therefore each book introduces a select few new artist's names. In this way the child's knowledge horizon of Art History is gently expanded. **Proverbs for Kids** Oct 10 2020 Written by a Christianity Today International editor, this devotional from the Book of Proverbs is designed to be a platform for you to talk about the issues that your 7-10-year-old child faces every day. They are designed to be short and simple so that you are more likely to read them as a family consistently throughout the year. Much of what our children see on television, at school, on the internet, and so on shows us how much we need the Book of Proverbs. All we have to do is watch people around us to figure out how to do what is wrong. It is much harder to find those who will tell us what's right. King Solomon does just that in Proverbs. It's amazing to see that people really haven't changed much in 3,000 years. Kids wanted answers then, and they still do now. Proverbs 1:3 tells us that the Book of Proverbs will teach us how to be wise, self-controlled, honest, fair, and right. If we can help our children get a start on all those things while they are still young, think what terrific people they will be as adults!

Jurassic Adventure Jun 05 2020 At Dyslexit, we use a modern approach to design books for kids who struggle with dyslexia / Uniquely designed colored font → Fluency / d104/illustration separation → Focus / Low-contrast text/background → Perception We use a dyslexic font where letters have different colors, which helps children to subconsciously remember and connect the letters, resulting in improved fluency. Letters won't dance around anymore since attention will be kept on one letter at the time. d104 is separated from illustrations on independent pages, which keeps your child's focus on the text and prevents the loss of concentration that occurs when text is inside an illustration. Since text inside an illustration creates an unwanted distraction, this also facilitates reading in children with ADHD and autism. Visual perception is facilitated with a low contrast between text and background, which improves your child's readability. The carefully selected low-contrast background behind our letters will also create a huge reading improvement for children with Irlen Syndrome. Since illustrations are separate, there is enough space for larger more readable text, so there is no need for tools like colored overlays, rulers, or dyslexia glasses. Your child will experience overall improved reading comprehension and will be able to practice long, difficult dinosaur names. Dyslexit provides a reading solution, where there is no need for decodable chapter division. Your child can practice long sentences without waging an irritating battle with letters. Jurassic Adventure is a short story about an important, yet dangerous journey of a group of dinosaurs with some emotional scenes about friendship. It is an educational story that teaches children that they can always find friends, no matter what. Our mission is to help your child become a joyful reader, who will gain the skills and confidence needed to enter the world of self-reliant reading. Letters, words, and sentences will finally become a story!
