*Revolution and Culture* Oct 22 2019 Zenovia A. Sochor here assesses one of the most important debates within the Bolshevik leadership during the early years of Soviet power-that between A. A. Bogdanov and V. I. Lenin. Once comrades-in-arms, Bogdanov and Lenin became political rivals prior to the October Revolution. Their disagreements over political and cultural issues led to a split in the Bolshevik Party, with Bogdanov spearheading the party's left-wing faction and attracting a following

of notable intellectuals. Before Lenin died in 1924, however, he had succeeded in shaping Soviet society according to his own vision, and today Bolshevism is commonly identified with Leninism while Bogdanovism is little known. Sochor provides the first full exposition in English of Bogdanov's views, which, she asserts, must be understood to appreciate the choices available and the paths not taken during the formative years of the Soviet regime.

**Revolution 2.0** Oct 26 2022 The former Google executive and political activist tells the story of the Egyptian revolution he helped ignite through the power of social media. In the summer of 2010, thirty-year-old Google executive Wael Ghonim anonymously launched a Facebook page to protest the death of an Egyptian man at the hands of security forces. The page's following expanded quickly and moved from online protests to a nonconfrontational movement. On January 25, 2011, Tahrir Square resounded with calls for change. Yet just as the revolution began in earnest, Ghonim was captured and held for twelve days of brutal interrogation. After he was released, he gave a tearful speech on national television, and the protests grew more intense. Four days later, the president of Egypt was gone. In this riveting story, Ghonim takes us inside the movement and shares the keys to unleashing the power of crowds in the age of social networking. "A gripping chronicle of how a fear-frozen society finally topples its oppressors with the help of social media." —San Francisco Chronicle "Revolution 2.0 excels in chronicling the roiling tension in the months before the uprising, the careful organization required and the momentum it unleashed." —NPR.org

*The Fourth Industrial Revolution* Mar 19 2022 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

*Education 2.0* Apr 08 2021 Thirty years of spirited school reforms have failed to improve our schools and instead have left our public school systems in disarray. Meanwhile, employment prospects for high school and college graduates are fading, and the public is losing faith in its schools. The education paradigm inherited from the Industrial Era is in crisis. In the last decade, however, the Internet and new Web 2.0 technologies have placed the entirety of human knowledge in the hands of everyone. What will our educational institutions make of this unprecedented flood of Web-based

learning resources? How can schools be transformed to accommodate the new possibilities for personal and social learning? Leonard Waks gathers all the pieces of our current educational puzzle together in this groundbreaking book. Drawing on new organizational models grounded in complexity theory, Waks maps out an inspiring new paradigm for education in the Internet age, and connects all the dots in constructing detailed models for new schools-now transformed into "open learning centers." Finally, Waks details action steps readers can take to speed this transformative process along in their own locations.

**Mao and the Cultural Revolution (Volume 1)** Sep 20 2019 Acclaimed national researcher Hu Angang presents Mao and the Cultural Revolution, an immensely rich account of the massive political event of 1966 that brought seismic changes to the landscape of New China. ? A culmination of Mao Zedong's political ambitions, the Cultural Revolution restored his power and prestige as paramount leader, albeit at great costs to the economic and social development to the country. The impact of the movement — more significantly, the politics that drove it — deeply influences political philosophy in China today. ? Hu Angang's Mao and the Cultural Revolution provides a unique perspective and objective assessment of the progression of the Cultural Revolution, focusing on the intra-party politics, the Politburo's international outlook, and the political thought of the Chinese leadership that shaped these pivotal decades. Hu's research is a must-read for academic scholars demanding a native-centric account of the Cultural Revolution, as well as think-tank researchers desiring to understand the foundations of contemporary Chinese political thought.

**Revolution and the Rebirth of Inequality** Dec 24 2019

Law and Revolution, II Sep 25 2022 Harold Berman's masterwork narrates the interaction of evolution and revolution in the development of Western law. This new volume explores two successive transformations of the Western legal tradition under the impact of the sixteenth-century German Reformation and the seventeenth-century English Revolution, with particular emphasis on Lutheran and Calvinist influences. Berman examines the far-reaching consequences of these apocalyptic political and social upheavals on the systems of legal philosophy, legal science, criminal law, civil and economic law, and social law in Germany and England and throughout Europe as a whole. Berman challenges both conventional approaches to legal history, which have neglected the religious foundations of Western legal systems, and standard social theory, which has paid insufficient attention to the communitarian dimensions of early modern economic law, including corporation law and social welfare. Clearly written and cogently argued, this long-awaited, magisterial work is a major contribution to an understanding of the relationship of law to Western belief systems.

**The Oxford Companion to Comparative Politics** Jul 31 2020 Fills a gap in scholarship on an increasingly important field within Political Science. Comparative Politics, the discipline devoted to the politics of other countries or peoples, has been steadily gaining prominence as a field of study, allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit.
